

Fundamental Principles of Official Statistics

The General Assembly,

Recalling recent resolutions¹ of the General Assembly and the Economic and Social Council highlighting the fundamental importance of official statistics for the national and global development agenda,

Bearing in mind the critical role of high-quality official statistical information in analysis and informed policy decision-making in support of sustainable development, peace and security, as well as for mutual knowledge and trade among the States and peoples of an increasingly connected world, demanding openness and transparency,

Bearing in mind also that the essential trust of the public in the integrity of official statistical systems and confidence in statistics depend to a large extent on respect for the fundamental values and principles that are the basis of any society seeking to understand itself and respect the rights of its members, and in this context that professional independence and accountability of statistical agencies are crucial,

Stressing that, in order to be effective, the fundamental values and principles that govern statistical work have to be guaranteed by legal and institutional frameworks and be respected at all political levels and by all stakeholders in national statistical systems,

Endorses the Fundamental Principles of Official Statistics set out below, as adopted by the Statistical Commission in 1994² and reaffirmed in 2013, and endorsed by the Economic and Social Council in its resolution 2013/21 of 24 July 2013:

* General Assembly Resolution 68/261 adopted on 29 January 2014. The "titles" of the Principles are not part of the original text.

¹ These include General Assembly resolution 64/267 on World Statistics Day and Economic and Social Council resolutions 2005/13 on the 2010 World Population and Housing Census Programme, 2006/6 on strengthening statistical capacity and 2013/21 on the Fundamental Principles of Official Statistics.

² For the original preamble used on the occasion of the initial adoption of the Fundamental Principles in 1994, see chapter V of the report of the Statistical Commission on its special session (*Official Records of the Economic and Social Council, 1994, Supplement No. 9 (E/1994/29)*). More information on the Fundamental Principles and their history is available from the website of the Statistics Division.

Principle 1: *Relevance, Impartiality, and Equal Access*

Official statistics provide an indispensable element in the information system of a democratic society, serving the Government, the economy and the public with data about the economic, demographic, social and environmental situation. To this end, official statistics that meet the test of practical utility are to be compiled and made available on an impartial basis by official statistical agencies to honour citizens' entitlement to public information.

Principle 2: *Professional Standards, Scientific Principles, and Professional Ethics*

To retain trust in official statistics, the statistical agencies need to decide according to strictly professional considerations, including scientific principles and professional ethics, on the methods and procedures for the collection, processing, storage and presentation of statistical data.

Principle 3: *Accountability and Transparency*

To facilitate a correct interpretation of the data, the statistical agencies are to present information according to scientific standards on the sources, methods and procedures of the statistics.

Principle 4: *Prevention of Misuse*

The statistical agencies are entitled to comment on erroneous interpretation and misuse of statistics.

Principle 5: *Sources of Official Statistics*

Data for statistical purposes may be drawn from all types of sources, be they statistical surveys or administrative records. Statistical agencies are to choose the source with regard to quality, timeliness, costs and the burden on respondents.

Principle 6: *Confidentiality*

Individual data collected by statistical agencies for statistical compilation, whether they refer to natural or legal persons, are to be strictly confidential and used exclusively for statistical purposes.

Principle 7: *Legislation*

The laws, regulations and measures under which the statistical systems operate are to be made public.

Principle 8: *National Coordination*

Coordination among statistical agencies within countries is essential to achieve consistency and efficiency in the statistical system.

Principle 9: *Use of International Standards*

The use by statistical agencies in each country of international concepts, classifications and methods promotes the consistency and efficiency of statistical systems at all official levels.

Principle 10: *International Cooperation*

Bilateral and multilateral cooperation in statistics contributes to the improvement of systems of official statistics in all countries.

Indian Statistical System
and
Ministry of Statistics & Programme Implementation

EVOLUTION

- Foundation laid during pre-independence-era.
- During British rule the system of collection of statistics improved and more areas covered
- Post-Independence: Central Statistical Unit (1949) later Central Statistical Organization (1951); Directorate of the National Sample Survey (1950), the computer Centre (1967) and the National Sample Survey Organisation (1970). Ministry of Statistics & Programme Implementation (MOSPI) (1999).

Present Statistical System

- Indian Statistical System functions within the overall administrative framework of the country
- Administrative functions are divided between the national and the State Governments
- Responsibilities are further divided amongst the various Ministries and Departments.
- The collection of statistics on any subject generally vests with the authority responsible for that subject.
- The Statistical System is supported and regulated by legislative framework.
- **Collection of Statistics Act, 2008** An Act to facilitate the collection of statistics on economic, demographic, social, scientific and environmental aspects, and for matters connected therewith or incidental thereto.
 - a. Preliminary
 - b. Collection of statistics
 - c. Disclosure of information in certain cases and restrictions of their uses.
 - d. Offences and penalty
 - e. Power in respect of core statistics
 - f. miscellaneous
 - **Registration of Birth and Death (RBD) Act, 1969**
 - a. Preliminary
 - b. Registration establishment (RGI)
 - c. Registration of birth and death
 - d. Maintenance of records and statistics
 - e. Miscellaneous
 - **Census Act, 1948**
 - a.
 - **Factories Act 1948;**
 - a. Preliminary
 - b. The inspecting staff
 - c. Health
 - d. Safety
 - e. Provision relating to hazardous process
 - f. Welfare
 - g. Working hours of adult
 - h. Employment of young persons
 - i. Annual leave with wages
 - j. Special provisions
 - k. Penalties and procedures
 - l. Supplemental
 - **Payment of Wages Act 1936**

Statistical offices at the center

1. CSO
2. NSSO
3. Office of the registrar general
 - a. Under MOH, paying attention on work of the decennial census services.
 - b. Work as ex officio, collection, compilation and improvement of vital statistics from 1960.
 - c. Sample registration system for "Birth and death rate" and model registration scheme for **cause-of-death** rates.
 - d. Census of India reports, vital statistics of India (annually), sample registration bulletin.
 - e. **Vital stats:** sample registration system, civil registration system, annual health survey, medical certification of **cause-death**.
4. Directorate general of commercial intelligence and statistics (DGCIS (1895)).
 - a. Responsible for commercial intelligence and trade statistics
 - b. The licensing statistics and the balance of trade statistics relating to the country's external trade are handled by chief comptroller of India and RBI respectively
5. Directorate of Economics and Statistics (Des) 1947
 - a. Attached to ministry of agriculture and irrigation
 - b. Besides agriculture proper (i.e. land utilization, area under the crops and crop production), livestock, forests, and fisheries.
 - c. Indian agricultural statistics (annual), Indian livestock census (decennial)
6. Labour bureau 1946
 - a. Collects compiles, publishes statistics of employment (BY NSSO) in respect of factories, mines, plantations, shops, commercial establishments, etc.
 - b. It constructs CPI (industrial workers and agricultural labour).
 - c. For the others indexes it depends on NSSO
 - d. It brings out pamphlets of different aspect of labour legislation
 - e. Retail price data collected by
7. Army statistical organization 1947

Statistical offices at the state

1. Bureau of economics and statistics
 - a. Maintenance of liaison between states and center
 - b. Undertaking statistical work under planning.

Census (RGI census commissioner for all censuses) 1871-72

1. There two method of obtaining
 - a. **Canvasser method:** under this enumerator records answer on the schedules by himself. This is practical method for this current time.
 - b. **Householder methods:** under this enumerator give to every household and household owner filed the schedules by own self and this is not much in practice because of literacy in Indian is still low.
2. Counting of population

- a. **De facto:** in this case, every person is counted at the place where he/she is actually found on the reference date of census
- b. **De jure:** a person is counted at the place of his/her normal residence. Since 1941 we switched over this method earlier it was de facto canvasser.
3. **Houselist, household schedules and the individuals slip are three way capturing data.**

Census 2011

The Census 2011 is the 15th National census survey conducted by the Census Organization of India. Mr. C. Chandramouli is the Commissioner & Registrar General of the Indian 2011 Census. The 2011 Indian National Census has been conducted in 2 phases - house listing and population. The national census survey covered all the 28 states of the country and 7 Union territories including 640 districts, 497 cities, 5767 tehsils & over 6 lakh villages.

Transgender population was counted in population census in India for the first time in 2011.

Two phases were Houselist schedule and population enumeration.

1. The House-listing schedule contained 35 questions and NPC was in this phase too
2. The Population enumeration schedule contained 30 questions
3. The National Population Register household schedule contained 9 questions

Rules and act:

1. The Census Act, 1948
2. The Census Rules, 1990
3. The Citizenship Act, 1955
4. The Registration of Births and Deaths Act, 1969
5. ORGI Notification dated 23-04-2010
6. Questions in Houselisting & Housing Census for Census 2011) dated 07-01-2020

Registration of Vital events (RGI)

1. Sample registration system

- a) Replace the civil registration system in 1960. It provides reliable estimates of birth and death rates for the States and also at All India level
- b) A representative sample of the population is covered and NOT the WHOLE population
- c) It is based on dual records system.
- d) First a baseline survey of sampled unit is done.
- e) This is followed by continuous enumeration of vital events of the areas by an enumerator.
- f) Independent retrospective 6-monthly surveys are done for recording births and deaths which occurred in the preceding 6 months and the number is matched with the one reported by the enumerator. Not only the numbers of vital events should match, it is also verified if the births and deaths reported by the enumerator are the same ones which the survey has found out. This is called as '**Matching of events**' by the observer.
- g) The main objective of SRS is to provide reliable estimates of birth rate, death rate and infant mortality rate at the national division level for Major States and at the State level for Smaller States.

Structure of sample registration system

1. **Baseline survey:** to obtain usual resident population of the sample areas

2. **Continuous** (longitudinal) enumeration
3. **Half-yearly survey** Independent retrospective, up-dating the Houselist, Household schedule and the list of women in the reproductive age
4. **Matching:** during both recorded on 2 & 3 above
5. **Field verification of unmatched and partially matched events:**
6. **Filling of Verbal Autopsy Forms for finalized deaths.**

Civil registration system

- h) co-ordination with the State Government on behalf of the RGI.
 - i) Monitoring of implementation of various provisions of the RBD Act. 1969,
 - j) Publicity on importance of birth and death registration at the local level.
 - k) Providing assistance to the Chief Registrars for conduct of training to the registration functionaries working under the system of Civil Registration and for preservation and maintenance of legal CR records.
 - l) Modernization of registration system in the State by way of computerization
 - m) Monthly meeting with the Chief Registrars.
 - n) To ensure monthly meetings at district level,
 - o) Regular inspections of Registration Units under the system of Civil Registration, at least once in a month.
2. **Annual health survey**
 3. **Medical certification of cause death.**
 4. **Model registration scheme 1965.**
 5. **Publication by RGI**
 - a. Vital statistics annual
 - b. Sample registration bulletin quarterly
 - c. Cause of death annual

Main Features of the Indian Statistical System

- 'Administrative Statistics' forms the core of the statistical system at the national as well as state level
- It is laterally and vertically decentralized;
- The system focuses on collection of reliable data following a standardized definition, methodology, training of its personnel and its dissemination, in a timely manner; and
- National level data base is a collation of state level data base, which in turn is collected from the district and sub-district levels.
- Large scale statistical operations like Population Census, Annual Survey of Industries, Economic Census, Consumer Expenditure Surveys are centralized
- CSO in MoS&PI – nodal agency for a planned development in the statistical system and for bringing about coordination in statistical activities between Centre and State

Division of subjects between National and State Governments

- Federal structure influencing the organisation of the statistical system.
- Division of administrative functions between the Government of India and the State Governments is on the basis of 3-fold subject classifications as per the Constitution of India: Union, State and Concurrent Lists.

Guided by Constitution: Seventh Schedule: [Article 246]

List I - Union List (Total of 97 entries)

- Entry 69 – Census
- Entry 94 – Inquiries, Surveys and Statistics for the purpose of any of the matters in this list

List II - State List (Total of 66 entries)

List III - Concurrent List (47 entries) industry, education trade unions, labour, relief and rehabilitation etc.

Entry 45 – Inquiries and statistics for the purpose of any of the matters specified in List II or List III;

Entry 30 – Vital Statistics incl. registration of births and deaths

Statistical System at the Centre

- The collection of statistics for different subject-specific areas, like agriculture, labour, commerce, industry, etc. vests with the corresponding administrative ministries.
- Often the statistical information is collected as a by-product of administration or for monitoring the progress of specific programmes. Some of the ministries, like Agriculture, Water Resources, Health, etc. have full-fledged statistical divisions, while most others have only a nucleus cell.
- Large-scale statistical operations like the Population Census, Annual Survey of Industries, Economic Census, etc. are generally centralized, and these cater to the needs of other ministries and departments, as well as State Governments.
- In important ministries, officers of the Indian Statistical Service (ISS) and subordinate statistical staff perform the statistical functions.
- The Central Statistical Office (CSO) in the Ministry of Statistics and Programme Implementation (MoS&PI) is the nodal agency for a planned development of the statistical system in the country and for bringing about coordination in statistical activities among statistical agencies in the Government of India and State Directorates of Economics and Statistics.

Statistical System in the States

- The Statistical System in the States is similar to that at the Centre. It is generally decentralized laterally over the Departments of the State Government, with major Departments, such as, agriculture or health, having large statistical divisions for the work of departmental statistics.
- At the apex level is the Directorate (formerly Bureau) of Economics and Statistics (DES), which is formally responsible for the coordination of statistical activities in the State.
- The DESs have large organizations at the headquarters, with statistical offices in the districts and, in some cases, in the regions of the State. The statistical activity of the DESs is more or less uniform.
- They publish statistical abstracts and handbooks of the States, annual economic reviews or surveys, district statistical abstracts, and State budget analysis; work out the estimates of the State Domestic Product and Retail Price Index Numbers and engage in such other statistical activities as is relevant to the State.
- Many States have a common statistical cadre.

Functions of Ministry of Statistics/State Directorates

- **The Statistics wing of the Ministry consists of CSO, NSSO and the Computer Center. Its main responsibilities are broadly**
- Act as the nodal agency for the development of the Statistical System
- Coordination of statistical work to identify data gaps, avoid duplication etc. between Departments of Government of India and SSB or DES
- Maintenance of norms and standards

- To advise other Departments on Statistical matters
- Prepare National and Regional accounts and related Statistics
- Compile and release of Index of Industrial Production (IIP)
- Conduct economic censuses and follow up surveys, ASI etc.
- Conduct large scale sample surveys for creating database on socio-economic subjects
- Disseminate statistical information to National and International agencies
- Cadre Controlling Authority for ISS
- Ensure functioning of Indian Statistical Institute (ISI), Kolkata
- Liaison with international agencies in statistical matters
- **DES in the States broadly cover the following activities.**
- Co-ordination of Statistical activities among different departments of the State Governments
- Publication of Statistical abstracts
- Organizing surveys
- Liaison between statistical organizations of the Centre and States
- The Statistical work relating to Planning

Ministry of Statistics and Programme Implementation

- Ministry came into existence as an independent Ministry on 15-10-1999. Earlier it existed as the Department of Statistics;
- It is the nodal agency for planning integrated development of the statistical system in the country;

VISION

To be the best and most innovative National Statistical System in the world; and to effectively monitor the programmes and projects for ensuring efficient use of national resources.

OUR MISSION

- To make available reliable and timely statistics and to undertake regular assessment of data needs for informed decision making;
- To cater to the emerging data needs in a dynamic socio-economic context, to reduce respondent burden and to avoid unnecessary duplication in data collection and publication;
- To adopt and evolve standards and methodologies for statistics generated by various elements of the National Statistical System and to steer its development for further improvement and bridging data gaps;
- To ensure and strengthen trust and confidence of all stake holders in the National Statistical System by maintaining confidentiality of data providers and promoting integrity and impartiality of all elements of official statistics;
- To provide leadership and coordination to ensure harmonious, efficient and integrated functioning of all the elements of the National Statistical System;
- To continue to assess skill requirement, and develop human resource capacity at all levels of the statistical system;
- To participate and contribute actively in all international initiatives and to support development of Statistical Systems around the world;

- To facilitate and monitor infrastructure and large central projects to achieve high performance levels through systems improvement and adoption of best practices; and
- To facilitate and monitor the implementation of MPLADS, Twenty Point Programme and other programmes and schemes for socio-economic development of the country.

Ministry of Statistics and Programme Implementation (Functional Structure)

(Administrative Structure)

Secretary cum Chief Statistician of India
(Secretary to NSC)

STATISTICS WING

NATIONAL STATISTICS OFFICE

The National Statistics Office coordinates the statistical activities in the country and evolves statistical standards. NSO brings out important economic indicators such as Gross Domestic Product (GDP), Index of Industrial Product (IIP), Consumer Price Index (CPI) and other official statistics to support Government decision making and framing of appropriate socio-economic policies/programmes. The NSO also has a vast network of field offices spread across the length and breadth of the country for conducting nationwide large-scale socio-economic surveys on a regular basis for providing insight into various facets of economy and society at large. Being the nodal agency in the country for official Statistics, the NSO coordinate statistical activities amongst Ministries/Departments of the Government of India as well as with the State/UT Governments.

National Statistical Commission

- Indian Statistical System was comprehensively reviewed by Rangarajan Commission (2001)
- Following the recommendation of Rangarajan Commission, present NSC was set up through a Govt. Resolution on 1st June, 2005 and constituted on 12th July 2006;
- It has a part time Chairperson of MOS level, four part time Members and Secretary, Planning Commission as an ex-officio Member;
- Secretary (MOS&PI) cum Chief Statistician of India is the Secretary to the Commission.

Functions of the Commission

- a) to identify the core statistics, which are of national importance and are critical to the development of the economy;
- b) to constitute professional committees or working groups to assist the Commission on various technical issues;
- c) to evolve national policies and priorities relating to the statistical system;
- d) to evolve standard statistical concepts, definitions, classifications and methodologies in different areas in statistics and lay down national quality standards on core statistics;
- e) to evolve national strategies for the collection, tabulation and dissemination of core statistics, including the release calendar for various data sets;
- f) to evolve national strategies for human resource development on official statistics including information technology and communication needs of the statistical system;
- g) to evolve measures for improving public trust in official statistics;
- h) to evolve measures for effective co-ordination with State Governments and Union Territory Administrations on statistical activities including strengthening of existing institutional mechanisms;
- i) to exercise statistical co-ordination between Ministries, Departments and other agencies of the Central Government;
- j) to exercise statistical audit over the statistical activities to ensure quality and integrity of the statistical products;
- k) to recommend to the Central Government, or any State Government, as the case may be, measures to effectively implement the standards, strategies and other measures evolved under clauses (c) to (h);
- l) to advise the Government on the requirement of legislative measures on statistical matters including the statute for the National Statistical Commission;
- m) to monitor and review the functioning of the statistical system in the light of the laid down policies, standards and methodologies and recommend measures for enhanced performance.

Central Statistical Organization(decentralized)

- ✓ It is headed by a Director General;
- ✓ It has 5 main Divisions and a Computer Centre –Divisions are headed by ADGs and Computer Centre by a DDG;
- ✓ Compilation and publication of national income statistics.
- ✓ Annual Survey of Industry (ASI).

Main objectives:

- ✓ Coordination of statistical work with a view to identifying gaps in data availability or duplication of statistical work in respect of Departments of the Government of India and the State Statistical Bureaus (SSBs) and to suggest necessary remedial measures;
- ✓ Laying down and maintenance of norms and standards in the field of statistics, evolving concepts, definitions and methodology of data collection, processing of data and dissemination of results;
- ✓ Advising the Departments of the Government of India on statistical methodology and on statistical analysis of data.

National Accounts Division:

- ✓ Headed by an Additional Director General;
- ✓ Preparation of National Income (GDP) Estimates;
- ✓ Compilation of CPI (Urban) and CPI (Rural);
- ✓ Coordination of International Comparison Programme (ICP) of United Nations.

The release calendar of National Income is as under:

- ☐ Advance Estimates for current year (7th February)
- ☐ Provisional Estimates for previous year (31st May)
- ☐ First Revised Estimates for previous year (31st January)
- ☐ Estimates for Q1 (Apr-Jun) (30th August)
- ☐ Estimates for Q2 (Jul-Sep) (30th November)
- ☐ Estimates for Q3 (Oct-Dec) (28th February)
- ☐ Estimates for Q4 (Jan-Mar) (31st May)

PUBLICATIONS OF NAD

- National Accounts Statistics (annual) – latest 2013
- National Accounts Statistics, Back Series from 1950-51
- Input Output Transactions Table– 2007-08
- National Accounts Statistics - Sources and Methods 2012
- State-wise and Crop-wise Value of Output - annual
- State-wise Item-wise value of output of minerals
- SNA 1993 compliant tables – annual

- State Domestic Product
- Detail list available on www.mospi.gov.in

NOTES ON THE STATEMENTS ACRONYMS USED IN THE PRESS RELEASE

CE: Compensation of Employees	GNI: Gross National Income
CFC: Consumption of Fixed Capital	GVA: Gross Value Added
CIS: Changes in Stock	MI: Mixed Income
GCF: Gross Capital Formation	NDP: Net Domestic Product
GDI: Gross Disposable Income	NNDI: Net National Disposable Income
GDP: Gross Domestic Product	NNI: Net National Income
GFCE: Government Final Consumption Expenditure	OS: Operating Surplus
GFCF: Gross Fixed Capital Formation	PFCE: Private Final Consumption Expenditure
GNDI: Gross National Disposable Income	ROW: Rest of the World
NIT: Net Indirect Taxes	fc: factor cost, mp: market price
Fc: making cost	NIFA: net income from abroad
	DEP: depreciation

(GDP)mp		
(-DEP.)	(+ NIFA)	(- NIT)
(NDP)mp	(GNP)mp	(GDP)fc
(+ NIFA)	(- NIT)	(-DEP.)
(NNP)mp	(GNP)fc	(NDP)fc
(- NIT)	(-DEP.)	(+ NIFA)
(NNP)fc=national income		

FORMULAE

1. GVA at basic prices = CE + OS/MI + CFC + Production taxes less Production subsidies
2. GDP = Σ GVA at basic prices (factor cost) + (Product taxes - Product subsidies) NIT
3. NDP/NNI = GDP/GNI - CFC (or depreciation)
4. GNI/GNP = GDP + Net primary income from abroad (ROW (Receipts less payments))
5. Primary Incomes = CE + Property and Entrepreneurial Income
6. NNDI = NNI + other current transfers from ROW, net (Receipts less payments)
7. GNDI = NNDI + CFC = GNI + other current transfers from ROW, net (Receipts less payments)
8. Gross Capital Formation = Gross Savings + Net Capital Inflow from ROW
9. GCF = GFCF + CIS + Valuables + "Errors and Omissions"
10. Gross Disposable Income of Govt. = GFCE + Gross Saving of General Government
11. Gross Disposable Income (GDI) of Households = GNDI - GDI of Govt. - Gross Savings of All Corporations

REMARKS ON THE FORMULAE:

1. Production taxes or subsidies are paid or received with relation to production and are independent of the volume of actual production. Some examples are:
Production Taxes - Land Revenues, Stamps and Registration fees
Production Subsidies - Subsidies to Railways, Subsidies to village and small industries
2. Product taxes or subsidies are paid or received on per unit of product. Some examples are:
Product Taxes: Excise Tax, Sales tax, Service Tax and Import and Export duties
Product Subsidies: Food, Petroleum and fertilizer subsidies
7. Other Current Transfers refers to current transfers other than the primary incomes
8. Estimate of GCF derived from this formula is taken as the "firmer" estimate and the difference between this estimate and the sum of GFCF, CIS and valuables are taken as "errors and omissions", as referred in
- 9 above.

Economic Statistics Division:

- ✓ Monthly release of Index of Industrial Production (IIP);
- ✓ Economic Census – 5th EC conducted in 2005, 6th EC in progress
- ✓ Energy Statistics; 2012 publication released;
- ✓ Annual Survey of Industries through CSO (IS Wing, Kolkata);
- ✓ National Industrial Classification through CSO (IS Wing, Kolkata); NIC 2008
- ✓ New Initiatives: Infrastructure statistics, Index of Service Production, National Product Classification.

Social Statistics Division

- Promotes research studies and seminars in official statistics by providing funds and data support
- Coordination in collection of basic statistics for local level development
- Organising workshops/seminars on several issues related to social statistics like gender, environment, labour statistics etc.
- Publication of secondary data
- Devinfo India – a tool for disseminating socioeconomic data through area specific maps based on NSSO, NFHS, Census data
- In 1998-99 conducted a time use survey to collect data for properly quantifying the economic contribution of women in the national economy
 - **Important Developments during 2019-20:** MoSPI, after a series of consultations with concerned Ministries/Departments, State Governments and other stakeholders have developed a National Indicator Framework (NIF) on Sustainable Development Goals (SDGs) consisting of 306 national indicators with identified data sources and periodicity.
- Two other publications, namely 'Handbook on National Indicator Framework (NIF)' and 'Data Snapshot on SDG National Indicator Framework Baseline Report 2015-16' were also released on 29th June 2019.

- The SDGs Dashboard was rolled out on 29th June 2019 and is hosted on the Ministry website. The SDGs Dashboard, developed by MoSPI in collaboration with UN Resident Coordinator (UNRC) Office, is a unified data repository on SDGs Indicators as per the National Indicator Framework. It can be accessed at the link, <http://www.sdgindia2030.mospi.gov.in/>.

SUSTAINABLE DEVELOPMENT GOALS

- | | |
|--|--|
| 1. No poverty | 10. Reduced in equality |
| 2. Zero hunger | 11. Sustainable cities and communities |
| 3. Good health and well being | 12. Responsible consumption and production |
| 4. Quality education | 13. Climate action |
| 5. Gender equality | 14. Life below water |
| 6. Clean water and sanitation | 15. Life on land |
| 7. Affordable and clean energy | 16. Peace justice and strong institution |
| 8. Decent work and economic growth | 17. Partnership for the goals |
| 9. Industry, innovation & infrastructure | |

- The Sustainable Development Goals (SDGs), also known as the Global Goals, were adopted by all United Nations Member States in 2015 as a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030. The 17 SDGs are integrated—that is, they recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability.
- Through the pledge to Leave No One Behind, countries have committed to fast-track progress for those furthest behind first. That is why the SDGs are designed to bring the world to several life-changing ‘zeros’, including zero poverty, hunger, AIDS and discrimination against women and girls.
- Everyone is needed to reach these ambitious targets. The creativity, knowhow, technology and financial resources from all of society is necessary to achieve the SDGs in every context.

Role of UNDP:

- As the lead UN development agency, UNDP is well-placed to help implement the Goals through our work in some 170 countries and territories.
- We support countries in achieving the SDGs through integrated solutions. Today’s complex challenges—from stemming the spread of disease to preventing conflict—cannot be tackled neatly in isolation. For UNDP, this means focusing on systems, root causes and connections between challenges—not just thematic sectors—to build solutions that respond to people’s daily realities.
- Our track record working across the Goals provides us with a valuable experience and proven policy expertise to ensure we all reach the targets set out in the SDGs by 2030. But we cannot do this alone.
- Achieving the SDGs requires the partnership of governments, private sector, civil society and citizens alike to make sure we leave a better planet for future generations.

2030 Agenda for Sustainable Development

- **People, planet, prosperity, peace and partnership.**

Social Statistics Division: Statistics & Publications

- ✓ Statistics on Gender and Environment;
- ✓ Regular publication 'Women & Men in India' – Last relates to 2012;
- ✓ Situation Analysis of Elderly in India 2011
