

Labour Statistics

Labour Bureau, Shimla/Chandigarh, Min of Labour and Employment

- **Functions of Labour Bureau**

Labour Bureau is discharging its functions by implementing a Central Sector Scheme "Labour & Employment Statistical System (LESS)" having the following components:

1. Consumer Price Index numbers for Industrial Workers on base year 2001=100 (CPI-IW).
2. Rural Labour Enquiry (RLE) (including construction of Consumer Price Index numbers for Agricultural and Rural Labourers).
3. Annual Survey of Industries.
4. Occupational Wage Survey (OWS).
5. Socio-economic Surveys of different Segments of Labour (SESDSL).
6. All-India survey on evaluation of Minimum Wages Act, 1948.
7. Quarterly Employment Survey (QES) / Revamped QES
8. All-India Survey on Employment-Unemployment.
9. Base Updation of CPI (IW) Index
10. Wage Rate Index
11. Area Frame Survey
12. Survey on Pradhan Mantri Mudra Yojna
13. Base Updation of CPI(AI/RL)
14. Base Updation of Wage Rate Indices (WRI)
15. Base Updation of CPI-IW 2021=100

- **CPI(Industrial Workers-IW)** by Labour Bureau, MoLE (2016=100)

-(CPI-IW) is being compiled for the industrial workers employed in any one of the seven sectors viz.

- | | | |
|--------------|--|---|
| 1. Factories | 2. Mines | 3. Plantations |
| 4. Railways | 5. Public motor transport undertakings | 6. Electricity generation and distribution establishments |
| | | 7. Ports and docks. |

-A working class family has been defined as one wherein one of the family members work as a manual worker in one of the 7 sectors as listed above and which derive one-half or more of its income through manual work.

-The Consumer Price Index Numbers for Industrial Workers (CPI-IW) for 50 centres and All-India on base 1960=100 was started w.e.f. August, 1968 index on the basis of Weighting Diagram drawn by conducting the Family Living Survey (FLS) in 1958-59.

-Uses of CPI-IW:

1. The CPI (IW) indices are mainly used for regulation of Dearness allowance and Wages of millions of Workers and Employees belonging to Central Government, State Governments, Public and Private sector Establishments in the country.
2. CPI-IW serves as an indicator of retail price situation in the country. The rate of inflation based on retail prices is measured through these indices.
3. These are also used for real wage calculation i.e. as deflators of money wages.
4. These indices are used for determining the poverty line in the country (in urban areas).
5. These indices are also used for price adjustments in Business, Individual and Public Works contracts.
6. The interest rates charged by Banks and other financial institutions undergo changes on the basis of inflation rates depicted by these indices
7. These indices help in the formulation of General Economic Policy of the Government particularly with reference to wages, prices and taxation.

- **CPI(Agricultural Labourers-AL/Rural Labourers-RL)** by Labour

Bureau, MoLE (1986-87=100)

-CPI(AL) started wef Sep,1964

-While the retail prices utilized in the compilation of CPI-AL and CPI-RL are same, the weights are different due to the difference in coverage of the two series. The coverage of CPI-AL is confined to households of the agricultural labourers whereas the CPI-RL is CPI-AL covers the households of rural labourers which includes agricultural labourers households also.

- i) **Rural Labour Households**

Rural Labour Households are those households whose income, during the last 365 days, was more from wage paid manual labour (agricultural and/or non-agricultural) than either from paid non-manual employment or from self-employment.

- ii) **Agricultural Labour households**

The rural labour households, who derive 50 per cent or more of their total income from wage paid manual labour in agricultural activities, are treated as agricultural labour households.

- **Socio-Economic Survey Division, Labour Bureau (MoLE)**

-The followings surveys are conducted by socio-economic survey division:

1. Survey of Working and living conditions of Workers belonging to Scheduled Castes and Scheduled Tribes Communities in Urban Areas.

{objective of the survey is to make available information regarding living and working conditions of the SC / ST workers}

2. Survey of Working and Living Conditions of workers engaged in the unorganized sector of Industries Employment

3. Socio-economic Conditions of Women Workers in Industry.

4. All India Survey on the Evaluation of Minimum Wages Act, 1948.

5. Quarterly Quick Employment Survey(QES)

-To assess the impact of economic slowdown on employment in India in selected sectors supposed to be badly affected by global economic slowdown
-first quarterly quick employment survey was conducted in the month of Jan, 2009 to assess the impact of economic slowdown on employment in India for the reference period Oct-Dec, 2008

6. Annual Employment & Unemployment Survey

-aim of the survey is to provide information on the employment unemployment scenario in the country on regular annual basis.
-first Employment & Unemployment Survey was conducted by Labour Bureau in the year 2010 for the reference period April, 2009 to March, 2010.
- 1st AEUS : 2010 ; 2nd AEUS : 2012 ; 3rd AEUS : 2013 ; 4th AEUS : 2015 ; 5th AEUS : 2016 ; 6th AEUS : 2020

• **Annual Survey of Industries (ASI)**

- main objectives of the Annual Survey of Industries (Labour Part) data which the Labour Bureau compiles are:

- a. To build a systematic database on Absenteeism; Labour Turnover; Earnings; Employment, and Labour Cost in Manufacturing Industries, and
- b. To analyse various components of Labour Costs such as Wage/Salary; Bonus; Provident Funds; Welfare Expenses, etc. in Manufacturing Industries.

-Labour Bureau, on its part, compile and disseminate data on Absenteeism, Labour Turnover, Employment, Man-days worked, Labour Cost and Wages and Earning and publishes two volumes viz. (i) Annual Survey of Industries {Volume-I} - Statistics on Employment and Labour Cost (ii) Annual Survey of Industries {Volume-II} – Report on Absenteeism, Labour Turnover, Employment and Labour Cost, which includes the results to both census and sample sector.

-provides statistical information to assess the changes in growth, composition and structure of organized manufacturing sector comprising activities related

to manufacturing process, repair services, gas and water supply and cold storage.

-functions of ASI scheme:

1. Field survey for ASI is conducted by FoD of NSSO. DDG, FoD is the Statistics Authority appointed under the Act.
2. CSO is responsible for processing and dissemination of data collected through Part-I of the ASI Schedule.
3. Labour Bureau, likewise, is responsible for processing and dissemination of data on employment, mandays worked, labour cost and cost of production collected through Block-E of Part-I and; absenteeism and labour turnover collected through Part-II of the ASI Schedule.

- **OCCUPATIONAL WAGE SURVEY SCHEME(OWS)**

-Objectives

i) To obtain occupation-wise data on employment, wage rates and dearness allowance for building up base year weights for updating the base of Wage Rate Index Numbers.

ii) To obtain data on different components of pay roll earnings for different occupations for scientific studies of inter-industry and intra-industry differentials in earnings in Service Sector, Plantation, Mining and Manufacturing industries.

-first OWS conducted in 1958-59

-The sampling design consists of two stages; the first stage-sampling units are the registered factories, while the second stage-sampling units are the workers employed in different occupations in the first stage units. The sampling design also stipulated that the estimates shall not differ from the true values by more than 5 percent with confidence co-efficient of 95 per cent.

- **WAGE RATE INDEX** (Base 2016=100 started wef Nov 2021 | Old Base was 1963-65)

-depicts movement of relative change experienced in the wage rates over a period of time.

-These indices are being compiled by the Labour Bureau for selected industries since 1969.

-At present the Wage Rate Indices are being compiled for 37 industries (30 manufacturing industries, 4 mining industries and 3 plantation industries) on base 2016 =100.

-In New WRI series with base 2016 = 100, the Manufacturing, Mining and Plantation sector have weights of 82.57 percent, 11.23 percent and 6.20 percent respectively.

-wage rate data are collected from the sample units in each of the selected industries through mailed questionnaire / field visits and relates to the month of January & July of each year. The data is collected only for Manual workers

-The indices are generated using the Laspeyre's formula, which is the ratio of the weighted average of wages of the current year to wages of the base year, employment in the base year as weights.

-**used in** fixation of minimum wages and national floor wages.

- **All India Survey on Domestic Workers** (by Labour Bureau, Chandigarh)

-First of its kind survey (started in Nov, 2021)

-aimed to estimate the number and proportion of domestic workers at National and State level, percentage distribution of domestic workers with respect to Live-in/Live-out, formal/ Informal Employment, Migrant/Non-Migrant, their wages and other socio-economic characteristics.

-also provide the Household Estimates of Live-in/Live-out domestic workers and average number of domestic workers engaged by different types of households.

-main objective are:

1. Estimate the number/proportion of DWs at National and State level.
2. Household Estimates of Live-in/ Live-out DWs.
3. Average number of DWs engaged by different types of households.

-collects information on the following broad parameters:

1. Household Characteristics such as HH size, Religion, Social Group, Usual Monthly Consumption Expenditure, Nature of Dwelling unit.
2. Demographic Characteristics such as Name, Age, Relation to Head, Marital Status, General Education Level, Usual Principal Activity Status, Subsidiary Activity Status and Status of DWs.

3. In addition to this, it also collects information on DWs such as their Age of entry, Social Group, Migrant status, Vocational Training/Education, Number of HHs served by DW, activities performed by them, and number of days worked, Duration of work, Type of remuneration and its frequency, Type of contract, Distance travelled, Engagement as DW before and after COVID-19 pandemic and its effect on wages and job, living conditions and social security benefits received.
4. Information on Employer HHs is also collected such as their preferences of DW regarding Gender and marital status, mode of payment of wages, number of days worked, mode of engagement, whether DW services were availed during COVID-19 pandemic, medical support given to DWs.

-Scope of survey

1. All India States/UTs of India covered are 37 and Districts covered are 742
2. Unit of Enumeration is Villages as per Census 2011 and Urban Blocks as per latest phase of UFS.
3. At the all-India level, a total number of 12766 First Stage Units (FSUs) i.e., 6190 villages and 6576 UFS blocks will be covered in the survey.
4. 1,50,000 Households i.e., the Ultimate Stage Units (USU) will be covered.

-result of the All-India Survey on Domestic Workers is expected within a time-span of 1 year.

-This survey is among 5 national job surveys. Other surveys are- (i) All India Survey of Migrant Workers, (ii) All India Survey of Employment generated by Professionals, (iii) All India Survey of Employment generated in Transport Sector, (iv) AQEES

- All India Quarterly Establishment based Employment Survey (**AQEES**) by Labour Bureau

-AQEES has two components:

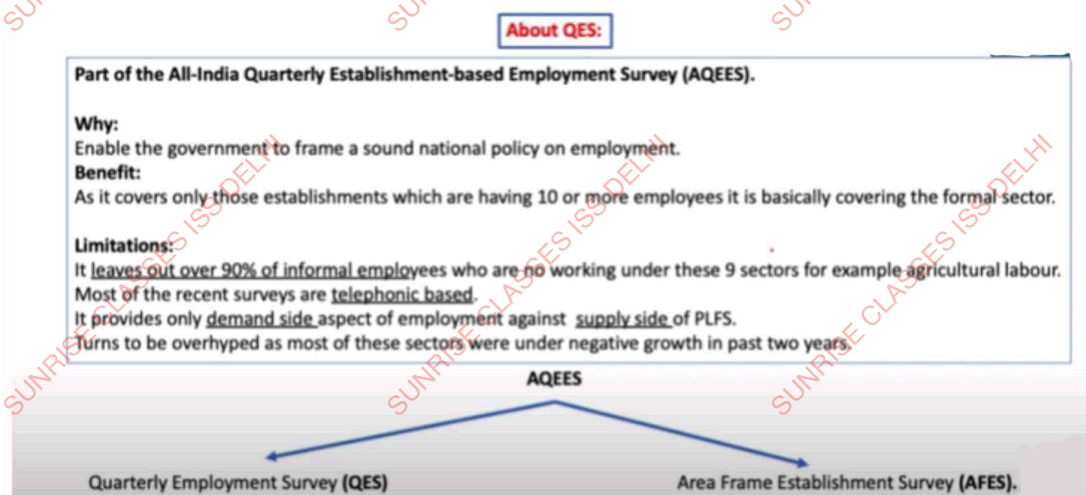

a) Quarterly Employment Survey (**QES**) in respect of establishments employing 10 or more workers (mostly constituting 'organised' segment)

-conducted by MoLabour and Employment

-covers 9 sectors: manufacturing, construction, trade, transport, education, health, accomodation&restaurants ,IT/BPOs, financial services sectors

b) Area Frame Establishment Survey (**AFES**) in respect of establishments employing 9 or less workers, from the 9 selected sectors (mostly constituting 'unorganised' segment)

- Demand Side means how much labour is demanded from the market by different industries and sectors while supply side means how much labour force is available in the market

QuickShot:

1.Contract Labour Survey by Labour Bureau (started in 1955) with the objective of this scheme is to ascertain the nature and extent of problems of contract labour in different industries and to assess the implementation of provisions prescribed for the welfare of contract labour under various enactment. Information on employment, wages and earnings, working conditions, welfare amenities, social security provided by the contractors and details of jobs performed by contract workers.
