

3.5.5 Block D: item 6: finished goods: All goods made by the factory which are ready for sale as on the reference date are to be included here. Finished goods processed by others and held by them from the raw materials supplied by the factory will **be included**, but *finished goods held by the factory after processing from raw materials supplied by others will be excluded*.

3.5.5.1 The valuation of the goods should be made at the price (excluding excise tax, sales tax, etc.) at which goods were sold by the factory immediately prior to the reference dates. Where this is not possible, book value may be taken.

3.5.6 Block D: item 8: cash in hand & at bank: Cash to be considered as current asset should be of liquid in nature. Deposit with telephone, electricity, etc. are not considered as current assets. Cheque issued but not presented will be included against this item. Stocks of postage stamps, revenue stamps, MO forms are to be included here.

3.5.6.1 Moreover, current account, savings bank account, short-term deposits are considered as current assets and hence included here. Drafts in hand will be included here. *Fixed deposit of any nature that can be liquidated instantly with or without penal charges will be included here irrespective of their tenure.* Any remittance in transit will be **excluded**.

3.5.7 Block D: item 9: sundry debtors: In most manufacturing enterprises cash sales are less and most of the transactions are on credit basis. When credit is allowed to a customer (debtor) his current asset gets increased. All debtors taken together are called sundry debtors. Advances given to supplier / parties are to be **included**.

3.5.8 Block D: item 10: other current assets: Sometimes an establishment pays in advance which is recoverable in cash or kind or for value to be received. Sometimes an employer makes advance payment to its workers or employees. This advance payments are for short term and recoverable or adjusted against the following months' bills. Such advance payment will form a part of this item.

3.5.8.1 The items which will also be included in other current assets are:

- a) Bills receivable,
- b) Cheques in hand,
- c) Prepaid expenses,
- d) Balance with excise authorities,
- e) Advance income tax,
- f) Security deposits (if refundable within one year),
- g) Tender deposits of short duration,
- h) Rent receivable for rented out fixed assets,
- i) The interest charged by the factory for untimely payment from parties, and
- j) Excess service tax paid to the government.
- k) Short-term capital transactions (except share capital) receivable within a year.**

3.5.8.2 The items which will be excluded in other current assets are:

- a) Unused overdraft facility,
- b) Capital transactions like investment in private companies,
- c) Trade investment,
- d) Amount receivable for sale of fixed assets,
- e) Any advance relating to long term capital transactions, and
- f) Long term loan with interest thereon.

3.5.8.3 Sometimes, a negative entry is found in current asset figures from the balance sheet. *In such cases, the amount shown with negative value in current asset must be ascertained and if confirmed, it may be entered as positive value against “other current liability”.* Similarly, negative current liability has to be recorded against “**other current assets**”. In no case, the entries for current assets or current liability can be negative.

3.5.9 Block D: item 12: sundry creditors: Amounts owned by an enterprise on account of goods purchased or services received in respect of similar related contractual obligations. This will include sundry creditors for supplies (amount due on account of capital transactions are not to be included), sundry creditors for other finances, sundry creditors for other liabilities etc. It includes all advance payment received for supplying its goods to consumers.

3.5.10 Block D item 13: over draft, cash credit, other short term loan from banks & other financial institutions: This will include short-term loan from banks, other financial institutions, from Directors and others. Bank over drafts, cash credit, loan taken on hypothecation of raw materials and other current assets etc for a period up to one year are also to be included here.

3.5.11 Block D: item 14: other current liabilities: Bills payable, income tax collected from employees and to be paid to the Government and used as working capital, sale tax payable, service tax payable, unpaid property tax, unpaid excise duty, telephone bills and electricity bills payable, credit balance of subsidiary companies, **short-term capital transactions (except share capital) payable within a year** etc. are to be considered in this item. All provisions will also be included here. Expenses which are expected to be payable within a year are to be considered.

3.5.12 Block D: item 17: outstanding loans: In a manufacturing unit, the capital employed either as fixed assets or current assets, comes from ownership funds as well as borrowed funds. This borrowed fund is termed as loan. This loan may be secured and unsecured.

3.5.12.1 The secured loan which will form a part of this item are:

- (i) Debentures are uniform parts of a loan raised by a company and the public are invited to purchase as many as they wish. All kinds of debentures, i.e., non- convertible as well as **convertible debentures** will be considered as outstanding loan. **Convertible debentures are those debentures which remain a part of long-term liability of the unit till the**

date of redemption of the debentures. On the date of redemption, it becomes converted into share capital of the unit;

- (ii) Loans and advances from banks on hypothecation of fixed assets;
- (iii) Loans and advances from subsidiaries;
- (iv) Other loans and advances.

3.5.12.2 Unsecured Loans which will form part of these items are:

- (i) Fixed deposit - money deposit by the public at a certain rate of interest for a certain period;
- (ii) Other loans and advances from banks/financial institutions and others;
- (iii) Loan from Directors/ Friends: Loans taken from the friends and directors will be included, **but the interest accrued on them will not be included.** In case interest is included, it may be separated and recorded. If the interest cannot be separated, a footnote may be given to this effect.
- (iv) Short-term loans and advances taken in current liabilities will **not be included;**

3.6 Block E: employment and labour cost

3.6.0 The information in this block is also used by Labour Bureau. Central Statistics Office (IS Wing), Kolkata supplies the information of this block to Labour Bureau directly.

3.6.0.1 Particulars in this block should relate to all persons who work in and for the establishment including working proprietors and active business partners and unpaid family workers. However, Directors of incorporated enterprises who are paid solely for their attendance at meeting of the Board of Directors are to be **excluded**.

3.6.1 Block E: items 1 & 2: male & female workers directly employed: Include all persons employed directly (casual as well as regular) on payment of wages or salaries and engaged in any manufacturing process or its ancillary activities like cleaning any part of the machinery or any premises used for manufacturing or storing materials or any kind of work incidental to or connected with the manufacturing process.

3.6.1.1 Include also labour engaged in repair and maintenance or in production of fixed assets for factory's own use or labour employed for generating electricity or producing coal gas. Any person though engaged in manufacturing and its ancillary activities but not receiving any payment or salaries like working proprietor (working member in case of a cooperative factory) or unpaid family member, etc., is **not to be included** as worker even if he/she may be termed as a worker under the Factories Act, 1948. *It also excludes all persons holding positions of supervision or management or employed in confidential position even if classified as workers under the Factories Act, 1948.*

3.6.1.2 The following points are to be noted in filling up of this block:

- (i) Clerks employed in Planning Section, Estimating Section and Drawing Office will be included since their work is more or less directly connected with the manufacturing process or the articles manufactured. Also included will be gate-keeper if solely or mainly deputed for guarding a place where manufacturing process was carried on;
- (ii) In some highly automated manufacturing factory, there are only supervisors working in the factory floor. In such cases, if the person is directly engaged in production process, he/she should be treated as worker irrespective of his/her designation;
- (iii) In case some persons, who are not workers under the Factories Act, 1948 are given material by the factory to work in their own homes and return the finished product, as soon as completed, details of such persons should not be shown in this block. Remuneration paid to them for work done by them will be **shown in Item 1 of Block F**.

3.6.1.3 The particulars relating to workers directly employed should be shown separately for male and female workers against items 1 and 2 respectively. The particulars regarding workers employed through contractors should be shown against item 4. *Note that, each worker is to be categorized as male or female irrespective of whether he/she is a child or not.*

3.6.2 Block E: item 4: workers employed through contractors: The workers employed through contractor will come here.

3.6.3 Block E: item 6: supervisory & managerial staff: Include all persons holding positions of supervision or management (on regular or contract basis) *regardless of classification under the Factories Act, 1948.*

3.6.4 Block E: item 7: other employees: Include all employees other than workers, viz., clerks in administrative office, storekeeping section and welfare section (hospital, school, etc.) watch and ward staff. Also, include employees in the sale department as also those engaged in the purchase of raw materials, fixed assets, etc. for the factory.

3.6.4.1 If a salesman employed by a unit is stationed in a different place, but getting the salary from the unit producing the medicines, he should be considered as 'other employees' in Block E, and his salary should be recorded against 'wages/salaries' under Block E.

3.6.5 Block E: item 8: unpaid family members/ proprietor/ coop. members: Working proprietors/partners/family members/working members of cooperative society will be included against Items 1 to 7 **only when they are paid**; otherwise they are to be reported against Item 8. Exclude dormant or inactive partners and members of a proprietor's family.

3.6.6 Block E: item 10: bonus (in Rs.): Profit sharing, festival, year end, other bonuses and ex- gratia payments paid at less frequent intervals (i.e., other than bonuses paid more or less regularly for each pay period) are to be recorded under this item.

3.6.7 Block E: item 11: contribution to provident fund and other funds (in Rs.): It includes old age benefits like contribution to provident fund, pension, gratuity and contribution to other social security charges such as employee's state insurance, compensation for work injuries and occupational diseases, provident fund linked insurance retrenchment and lay-off benefits, payment made for VRS etc. The expenditure incurred for 'labour welfare fund' by the unit will be recorded here.

3.6.8 Block E: item 12: workmen & staff welfare expenses (in Rs.): Includes benefits in kind including neutralizing agents, fats, milk, molasses given to workers of a factory where there is possibility of health hazard. Also includes cheap ration, shoes, umbrellas, residence, etc. provided to workers who work at tea gardens. Light meal or lunch, beverages, tobacco, clothing (except uniform) electricity free of charge, water purchased but supplied free of charge, medical expenses. Children educational allowances, LTC, bus hired for to and fro daily journey (HRA will be considered as a part of wage and salary), maternity benefits and crèches, cultural and recreational facilities, cooperative stores for employees etc.

3.6.9 Block E: item 13: number of working days:

(i) **Manufacturing days** will mean and include number of days on which actual manufacturing process was carried out by the unit.

(ii) **Non-manufacturing days** will mean and include number of days on which only repair/maintenance and construction work was undertaken as well as non-working days. Non- Working day is the day on which neither manufacturing process nor repairing and maintenance work is carried out but the factory and/or office remains open.

3.6.10 Block E: columns 3: man-days worked on manufacturing days: The total number of man-days worked during the accounting year by each category of employees is obtained by summing up the number of workers attending in each shift over all shifts worked on all working days during the accounting year. This figure excludes persons who are paid but remain on leave/ strike etc.

3.6.11 Block E: columns 4: man-days worked on non-manufacturing days: The mandays worked on repair and maintenance and/or construction activities and also non-working days for each category of employees will be reported here. For factories having status of unit code 2, mandays are to be reported under non-manufacturing only.

3.6.12 Block E: columns 6: average number of persons worked: The Average number of persons worked is computed by dividing the total man days worked as reported in Column (5) by the number of working days reported against Item 13 (iii) of Block E.

3.6.13 Block E: columns 7: no. of mandays paid for: It includes mandays worked, mandays on weekly schedule holidays if paid for and those absences with pay as also mandays lost through pay off/ strike for which compensation was payable.

3.6.14 Block E: columns 8: wages/salary (in Rs.): Remuneration is related to an individual worker, in terms of money, directly or indirectly payable, more or less regularly for each pay period, in respect of his/her employment or work done in such employment. Includes

- (i) wages & salaries **including** paid for leave periods and holidays,
- (ii) payment for overtime, dearness, compensatory, house rent and other allowances,
- (iii) bonuses such as production bonus, good attendance bonus, incentive bonus etc. which are paid more or less regularly for each pay period,
- (iv) lay-off payments and compensation for unemployment except where such payments are made from trust or other social funds set up expressly for this purpose, i.e., payments, which are not made by the employer.

3.6.14.1 The amount of salaries/wages payable during the accounting year should be entered gross, i.e., **before deductions for** fines, damages, taxes, provident fund, employee's state insurance contributions etc. *For workers employed through contractors, payment made to these workers, and **not to the contractor** will be recorded. The difference between the payment made to the contractor and the payment actually accruing to the contractor's workers will be reported against Item 3 of Block F.* Benefits, in kind (perquisites) of individual nature are only included.

3.6.14.2 **Exclude:** employer's contribution to old age benefits, employer's contribution to other social security charges and imputed value of group benefits in kind and travelling and other expenditure incurred for business purposes and reimbursed by the employer.

3.6.14.3 The following points may be kept in view:

- 1) In case any payment is made by Government under the employment guarantee scheme to apprentices working in a factory this payment will not be considered for reporting under Column (8);
- 2) The amount of income tax of the employees paid by the factory owners over and above the salary will be included in salaries/wages;
- 3) Retaining allowances form part of wages/salary and the amount actually paid is to be included in salary/wages;
- 4) All allowances (for maintenance of car, upkeep of garden, etc.) paid in cash will be included with salary. In case the up-keeping is directly taken care of by the management, it will be treated as benefit in kind, and will be included if individual nature.

3.7 Block F: other expenses

This block includes the cost of other inputs - both the industrial and non-industrial service rendered by others that are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

3.7.1 Block F: item 1: work done by others on material supplied by the industrial undertaking: This covers payments made by the factory for contract and commission work done by others on materials supplied by the factory during the year. Payments to home workers and cost of similar work carried out by the factory's sister concerns are to be included.

3.7.2 Block F: item 2: repair & maintenance expenditure: The cost of materials consumed by the factory for repair and maintenance of buildings, plant & machinery, pollution control equipment and other fixed assets and cost of repairs and maintenance carried out by others to the factory's sister concerns is to be included, but capitalized (major) repairs are not included. It should be noted that materials consumed for repair and maintenance and those commodities that help to keep the fixed assets of a factory in shape and in a serviceable condition are distinguished from consumable stores, i.e., commodities which indirectly help in production, without having anything to do with the upkeep of fixed assets of the factory. Consumable stores will **not be reported** here. The kerosene oil used for cleaning the machinery will be shown against Item 2 as it helps the machinery to remain in working condition.

3.7.2.1 The total expenditure incurred for repair and maintenance has to be bifurcated into that for buildings and other constructions which is to be reported in Item 2(i) and that for other fixed assets which is to be reported in Item 2(ii).

3.7.3 Block F: item 3: operating expenses: In business accounting this is also known as 'Selling, General and Administrative expenses. This item includes

(i) inward freight and transport charges; [If this item is available, the same amount should also be recorded in item 12 of Block-F (Inward Transportation Cost)]

(ii) rates and taxes excluding income tax, i.e., local rates, factory license, subscription to business association, boiler inspection fees, road tax for vehicles, provident fund administrative charges (to be segregated from the provident fund contribution), sales tax renewal fees, professional tax, property tax, and

(iii) purchase tax on materials.

3.7.3.1 Note that legal charges (including stamp papers) exclude fees paid to Income Tax/Sales Tax practitioners, as these are post-manufacturing expenses.

3.7.3.2 Sale tax paid on purchase of raw materials, if not added to the cost of raw material in Profit & Loss accounts, should be reported here.

3.7.3.3 “*Import license fee*” should be considered as “*operating expenses*” and recorded in Block F. But, if a part of the raw material has been procured under the “*import license fee*” and for the rest of the quantity, the right of import has been sold at a higher price, then the difference will be recorded against “*receipts from non-manufacturing services (including non-industrial services)*” in Block G.

3.7.3.4 It also includes payments for communication such as postage, telegrams, telex, telephones (rental as well as call charges), accounting (includes audit fee and payment to the auditor in other capacity), bank charges (which is an amount charged to a customer by a bank for collection, exchange, cheques drawn, other services exclusive of interest and discount), advertising (for sales promotion also), legal and similar services rendered to the statistical unit. Copy right, mining lease right should also be recorded here. The cost of advertisement is to be taken in full even if the expenditure is meant for coming year, printing and stationery (including technical magazines and periodicals), miscellaneous (such as purchase agency services, technical know-how and consultancy charges, medical examination fees for recruitment of staff, Directors fees and all other non-industrial services), payment made to the labour contractor (other than the payment to the contract labour), filing fee, etc. Exchange fluctuation loss of the factory should be included. “*Key man insurance*” should be recorded here.

3.7.3.5 The uniform provided by the employer to its employees for wearing during working hours mandatorily should be considered as operating expenses and recorded in Item 3 of Block F.

3.7.4 Block F: item 4: Expenses on raw materials and other components for own construction: This item will include the expenses incurred for own construction (*Block G item 4*) by a factory including raw materials and other components.

3.7.4.1 However, labour cost incurred for own construction should not be included against this item. In fact, labour cost for own construction may be included in Block E.

3.7.4.2 If there is any entry against Block G item 4 (*Value of Own Construction*), then there should be some appropriate entry against this item and vice versa.

3.7.5 Block F: item 5: insurance charges: A promise of compensation for specific potential future losses in exchange for a periodic payment. The charge in this regard made by the factory to the concern comes under here.

3.7.6 Block F: item 6: rent paid for plant and machinery & other fixed assets: The rent paid for hiring the plant & machinery for the financial year is reported here. The rent paid for other fixed asset also qualifies here.

3.7.7 Block F: item 7: expenses on research & development (R&D): The expenses incurred by the unit for research & development have to be reported under this item. Care should be taken to see that pure routine expenses, though the same may be connected with the research & development, should not be included against this item. Again, if any of such expenditure is included in any of the preceding items, the same should not be repeated against this item.

3.7.7.1 This item should normally be filled in only in cases where the codes of 1 or 2 are there against Item 9 of Block B.

3.7.8 Block F: item 8: rent paid for buildings: The rent paid for hiring the building for the financial year is reported here.

3.7.9 Block F: item 9: rent paid for land on lease or royalties on mines, quarries and similar assets: It **excludes** the amount of royalties paid for procuring raw materials such as extraction of lime stones from quarries.

3.7.10 Block F: item 10: interest paid: Include all interest paid on factory account on loans irrespective of duration and nature of agency/party from which loan was taken. Interest paid to partners and proprietors on capital **will not be included**.

3.7.11 Block F: item 11: purchase value of goods sold in the same condition as purchased: All sales of a factory can be classified according to whether the sale is

- (i) of the product of the factory,
- (ii) of goods incidental to manufacturing, and
- (iii) other items not connected with manufacturing.

Item 11 will relate such of the goods of (ii) and (iii) above, which are sold in the same condition as purchased, i.e., without any transformation.

3.7.11.1 If a factory manufacturing cottonseed oil from oil seeds also purchases and sells cotton as a subsidiary activity, the purchase value of cotton sold during the year will be entered against Item 11.

3.7.11.2 If a factory purchased some spare parts with the intention of using these in the manufacture of machinery but sells some of the spare parts during the year, the purchase value of these spare parts sold will be entered here. *Activities carried on shops and commercial establishments, goods purchased and sold, as a part of speculative activities (in the nature of purchase and sale without delivery of goods) will be excluded.* The purchase value of electricity sold, if any, is also to be reported here.

3.7.12 Block F: item 12: inward transportation cost

3.7.12.1 The expenses incurred by the unit towards inward transport cost are to be recorded here separately. However, from para 3.7.3 (i) above, it may be noted that this item is already accounted for in the Operating Expenses of the unit (Item 3 of Block F) or included in the purchase value of raw materials in block H/I (para 3.9.0.2) and hence to avoid duplication, this item is not to be taken into consideration for calculating total input of the factory. This item along with the item 13 of Block F (outward transportation cost) are collected separately to get an estimate of the transportation cost from ASI data explicitly.

3.7.13 Block F: item 13: outward transportation cost

3.7.13.1 The expenses incurred by the unit towards outward transport cost are to be recorded here separately. However, this component would continue to be considered under distributive expenses (wherever applicable) in Block J (para 3.11.9) and hence would not be considered while calculating the input and output of the unit. As mentioned in 3.7.12.1 above, this item along with the item 12 of Block F (inward transportation cost) are required to get an estimate of the transportation cost from ASI data explicitly.

3.8 Block G: other output/receipts

In this block, information on other output/receipts is to be reported.

3.8.1 Block G: item 1: receipts from manufacturing services (including work done for others on materials supplied by them and sale value of waste left by the party): This item includes receipts for work done for others or for various manufacturing services (job work done) rendered to others, as for example contract or commission work done for other establishments on their materials or repair and maintenance on machinery and equipment, whether such services are rendered inside or outside the factory premises. The value reported should be the total amount charged to customers for the work or services performed.

3.8.1.1 Sometimes, a tax viz. 'work contract tax' is being paid by the factory on the job-work done on material supplied by others. *Such tax paid, if available in Profit & Loss Accounts, should be recorded in Block F, item 3 (operating expenses) and the service charges received against the job done by the factory will be reported against item 1 of Block G.*

3.8.1.2 This item excludes:

- (i) *imputed value of free services after sales during the warranty period to own products sold;*
- (ii) *repairs to own fixed assets, e.g., owned vehicles in a State Transport Workshop;*
- (iii) *servicing on its own account, i.e., repairing or processing work done on the items furnished by itself for sale or exchange.*

3.8.2 Block G: item 2: receipts from non-manufacturing services (including non-industrial services): It includes all receipts of the factory from others for providing non-manufacturing services including those of non-industrial nature such as transportation, agency, consultancy, etc. Income due to exchange rate fluctuation should be included here.

3.8.3 Block G: item 3: value of electricity generated and sold: This item will be applicable to factories other than electricity undertaking where electricity is produced and sold. The entry against this item is not to be made in case of units engaged in the generation, transmission and distribution of electricity. In this case the quantity as well as the value of electricity produced will be shown in Block J. Book value of electricity produced

will be shown in case of supply to sister concern under the same ownership and market value in other cases.

3.8.4 Block G: item 4: value of own construction: The cost of development of productive fixed assets during the accounting year by the factory itself is to be reported here. It will include the net balance of semi-finished fixed assets or fixed capital work-in-progress plus actual addition to completed fixed assets, by virtue of own construction of the factory, during the reference period. The first part i.e. the net balance of fixed capital work-in-progress i.e. (Col. 7 – Col.3) of item 9 in Block C, **if positive**, will be added to this item.

3.8.4.1 *If there is any entry against Block F item 4 (Expenses on raw materials and other components for own construction), then there must be some appropriate entry against this item.*

3.8.5 Block G: item 5: net balance of goods sold in the same condition as purchased: it is the difference between item 11 block G and item 11 block F.

3.8.6 Block G: item 6: rent received for plant and machinery and other fixed assets: The rent received for renting out the Plant and Machinery for the financial year is reported here. The rent received for other fixed asset also qualifies here.

3.8.7 Block G: item 7: variation in stock of semi-finished goods: The difference of the figures in Columns (4) and (3) of Item 5 of Block D will be recorded here.

3.8.8 Block G: item 8: rent received for building: The rent received for renting out the building for the financial year is reported here.

3.8.9 Block G: item 9: rent received for land on lease or royalties on mines, quarries and similar assets: The rent received for the land leased out by the factory or royalty received for any patent of assets.

3.8.10 Block G: item 10: interest received: Include all interest received on factory account on loans irrespective of duration and nature of agency/party to which loan was given. The interest from fixed deposit will also be included here as fixed deposit of any tenure is now considered as current asset in ASI.

3.8.11 Block G: item 11: sale value of goods sold in the same condition as purchased: The sale value of all goods sold in the accounting year in the same condition as purchased is to be reported. For the items to be included under this, instructions as given in Item 11 of Block F above relating to purchase value of goods sold in the same condition as purchased will apply.

3.8.11.1 It should be noted that this item includes the value of sales of goods normally consumed by the factory when sold as purchased as well as the sale value of goods brought expressly for resale. As the scrap and discarded material are not considered as by-product in general and are sold in the same condition as purchased, sale value of scrap & discarded material may be included here. In case electricity purchased is sold, its value will be reported against this item and its corresponding purchase value will be reported against Item 11 of Block F.

3.8.12 **Block G: item 12: Other Production Subsidies:** A subsidy is a form of financial assistance paid to a business or economic sector. Most subsidies are made by the government to producers or distributors in an industry to prevent the decline of that industry (e.g., as a result of continuous unprofitable operations) or an increase in the prices of its products or simply to encourage it to hire more labour (as in the case of a wage subsidy). **Other subsidies on production like subsidy received from the Government for employing physically handicapped persons, installing pollution control in the factory, training of workers etc may be included against this item as distinct from product subsidy which should be considered in Block J.**

3.8.12.1 The amount of subsidy that relates only to the reference year is to be apportioned and recorded. If the subsidy has been claimed for the current (reference) year but not yet received, then the expected value of the subsidy to be received for the current reference year should be recorded.

3.9 Block H: indigenous input items consumed

3.9.0.1 This block covers all those goods (raw materials, components, chemicals, packing material, etc.), which entered into the production process of the factory during the accounting year. All intermediate products consumed during the year are to be **excluded**. Intermediate products are those, which are produced by the factory but are, subject to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

3.9.0.2 Valuation of the goods consumed should be at the delivered value to the factory. It includes besides the purchase value, cost of transport to factory, commission to purchasing agents and taxes or duties paid thereon. Transfer of goods from sister concern should be valued according to book values. If the item-wise bifurcations on raw materials in respect of inward transport are not available, then only the same should be shown against Operating Expenses (F3). In all other cases, they should be added to the respective raw materials. The same is applicable to purchase tax on raw material also.

3.9.0.3 Where a material is not purchased but obtained from any other source, such as mine taken on lease, the purchase value of such material is to be taken as equal to the cost of production which is inclusive of the annual amount of the lease money paid plus the cost of transport, or other incidental charges incurred in bringing the material to the factory. For example, in case of cement factory, which paid certain amount to the lessor of a quarry for the right to work there and obtained limestone needed by it, the purchase value of the material is to be estimated as the annual amount of lease money paid plus transport and other charges incurred in this connection.

3.9.0.4 Materials purchased at any time but not consumed during the year, those lost through theft or damages and materials produced and consumed in the process of production are to be **excluded**.

3.9.1 Block H: items 1-11: basic materials: Details of all basic materials consumed during the year are to be reported both in quantity and value along with unit of quantity against Item 1 to 10. If the number of basic materials exceeds 10, then additional rows may be added to record the input items with serial numbers starting from 25. From ASI 2015-16 onwards, revised version of National Product Classification for Manufacturing Sector (NPCMS) 2011, a seven digit product classification developed based on CPC, Version 2 is used for classifying the items in Blocks H, I and J. If electricity is generated from the purchased water then the same is to be considered as a basic input, and the quantity as well as value of water purchased will be recorded in Block H. However, if the water is taken from natural source without incurring any cost, then it should not be considered as a basic input, as it has got no economic significance as such. It may be noted that NPCMS descriptions are not based on any local or brand name. The names may be in generic form, especially in pharmaceutical products.

3.9.2 Block H: item 13: non-basic chemicals – all kinds: All types of non-basic chemicals including that used in laboratory testing, which are not used as raw materials, consumed during the year are to be reported here in value terms only.

3.9.3 Block H: item 14: packing items: The different packing items consumed for different industrial activity while producing the final products qualifies here.

3.9.4 Block H: item 15: electricity own generated: Only number of units (KWH) of electricity own generated and used for its consumption is to be reported in “quantity consumed” column. This item is not applicable for electricity generating units such as factories covered under State electricity board or under private sector.

3.9.5 Block H: item 16: electricity purchased and consumed: Quantity and value of electricity purchased for power and lighting is to be reported here.

3.9.6 Block H: item 17: petrol, diesel, oil, lubricants consumed: This will include petrol, diesel, furnace oil, mobil, grease, etc.

3.9.7 Block H: item 18: coal consumed: Unit of the quantity of coal consumed may be reported in tonne. It will also include coke, charcoal. Fuel that enter directly to the product, for example, coal in coke and gas production, coal used for carbonization are not treated as fuel and should be taken under Items 1 to 10 of this block against this item.

3.9.8 Block H: item 19: gas consumed: This will include biogas, other liquid petroleum gas, consumed as fuel will find place here. Unit of reporting should be kg.

3.9.9 Block H: item 20: other fuel consumed: This will include other fuel consumed like firewood consumed as fuel.

3.9.10 Block H: item 21: consumable store: Consumable stores are those items which are required for helping processing of raw material into end product and which lose their identity after the final product is manufactured i.e. cotton waste, crucible, bolts, etc.

Water used as basic raw material should be reported against basic items in Block H. Water used for drinking purpose for the staff should be treated as welfare expenses in Block E (Item 12) and water used for washing etc., i.e., consumable, should be reported under consumable stores in Block H (Item 21). If the break up is not available the total value may be reported under this item with appropriate remarks in the footnote.

3.9.11 Block H: item 24: any additional requirement of electricity (unmet demand): The purpose of this item is to estimate the loss of production due to non-availability of power/electricity required by factory. As such in addition to actual quantity of electricity consumed, the additional requirement of electricity that was not available and effected production (i.e., unmet demand) is to be reported. This may be derived as:

Additional requirement of electricity = Total demand / requirement of electricity - (electricity own generated, i.e., Item 15 of Block H + electricity purchased and consumed, i.e., Item 16 of Block H).

3.9.12 Block H: column 3: item code (NPCMS, 2011): This is to be filled in by field staff as per the latest revised version of NPCMS, 2011.

3.9.13 Block H: column 4: Unit: It should be reported in specified unit of revised NPCMS, 2011. In case unit has not been prescribed, unit reported by the factory is to be given.

3.10 Block I: Imported input items consumed

3.10.0 Information in this block is to be reported for all imported items consumed. **The items are to be imported by the factory directly only.** The instructions for filling up of this block are same as those for Block H. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence 'consumable stores' or 'packing items', if imported, should be recorded in Block I and not in Block H.

3.11 Block J: Products and by-products manufactured by the unit

3.11.0 In this block, information like quantity manufactured, quantity sold, gross sale value, excise duty, GST paid and *subsidy received*, per unit net sale value and ex-factory value of output will be furnished by the factory item by item. If the distributive expenses are not available product-wise, the details may be given on the basis of reasonable estimation.

3.11.1 Block J: column 2: product/by-products descriptions (no Brand name): It includes information on all goods that have been produced by the factory during the

accounting year for sale, irrespective of whether the products manufactured have actually been sold during the accounting year or entered into stocks. In addition,

- (i) manufactured products lost by theft or damaged or destroyed by fire; or
- (ii) products made over to other concerns under the same ownership and control and products for own use as goods in the factory being distinct from intermediate products, will be included. *If the products are used as intermediate products in own construction, they will be **excluded**.* In case of electricity undertaking, rent received for meter or transformer installed at the customer's premises will not be included here.

3.11.2 Block J: column 3: item code (NPCMS, 2011): This is to be filled in by field staff as per latest revised version of the NPCMS, 2011.

3.11.3 Block J: column 4: unit of quantity: It should be reported in specified unit of revised NPCMS, 2011. In case the description of the product is not available in revised NPCMS, 2011 and thus, unit of quantity is not available, unit reported by factory is to be recorded.

3.11.4 Block J: column 5: quantity manufactured: It will refer to the products and quantity manufactured during the reference financial year.

3.11.5 Block J: column 6: quantity sold: It will refer to the products and quantity sold during the reference financial year.

3.11.6 Block J: column 7: gross sale value: The gross sale value of the products as charged from the customers will be reported here. It includes excise duty/GST paid by the factory on behalf of the Government as also all distributive expenses incurred such as

- (i) discount or rebate, allowances for returnable cases or other packing and any other drawback allowed to customers,
- (ii) charges for carriage, outward, and
- (iii) commission to selling agents.

3.11.6.1 It should be noted that in case of factories where net sale value (after giving discount) is available, the gross sale value should be arrived at by adding excise duty, GST etc. In case gross sale value is not available, net sale value may be reported with a foot note. However, adjustments of accounts pertaining to earlier year shown in the profit and loss accounts of the year should not be taken into account.

3.11.6.2 Where part of the product of factory is exported at a loss, for convenience of calculation, calculate the sale value entirely on the basis of domestic pricing, ignoring loss on exports, cash subsidy received in the year, and profits made from sale of import entitlements or actual sale of mill stores, raw materials and machinery imported. Where a factory puts all its products in the foreign market for sale, calculate the same value on

ASI Schedule

the basis of value received from exports, together with the subsidy received or export incentive received, if any. For the products meant entirely for the domestic market and subsidy received from the Government, the same treatment will be given.

3.11.7 Block J: column 8: Goods and Services Tax (GST): The Goods and Services Tax amount charged to final product of a factory and *not charged to intermediate products or processes of production in the factor are to be reported.*

3.11.8 Block J: column 9: Excise Duty/ Sales Tax/VAT/ Other Taxes, if any: The Excise Duty/ Sales Tax/VAT/ Other Taxes, if any, applicable to products /by-products on which GST is not implemented, are to be reported here.

3.11.9 Block J: column 10: Other Distributive Expenses: Other distributive expenses i.e. outward transport, rebate, commission, transit insurance of goods sold, packing fees etc are to be recorded here. Export Insurance charges, if paid, should be treated as a part of distributive expenses and be recorded in Block J, and not as insurance charge covered in Block F.

3.11.10 Block J: column 11: subsidy: Any type of subsidy received from the Government on **products** is to be entered. The subsidy received has to be given on each item produced by the factory during the reference financial year.

3.11.11 Block J: column 12: per unit net sale value: To arrive at per unit net sale value, total distributive expenses [*i.e.* (Col. 8) + (Col.9) + (Col.10)-(Col. 11)] is to be deducted from gross sale value (Col.7) and then divided by quantity sold (Col. 6). Per unit net sale value is to be calculated upto 2 place of decimal.

3.11.12 Block J: column 13: ex-factory value of output (Rs.): Following procedure may be adopted for calculation of ex-factory value of output.

3.11.12.1 Per unit net sale value is to be calculated up to 2 place of decimal under Col. 12 and the same is to be multiplied by quantity manufactured shown under Col. 5 in respect of first ten major items at Srl. Nos. 1 to 10 and entry is to be recorded to the nearest whole rupee.

3.11.12.2 Ex-factory value for other products/by-products (Item 11) will be taken as entry in Col. 7 minus [(Col. 8) + (Col.9) + (Col.10)-(Col. 11)].

3.11.12.3 In case quantity manufactured (Col. 5) and quantity sold (Col. 6) are identical, the ex-factory value will be the entry under Col. 7 minus [(Col. 8) + (Col.9) + (Col.10)-(Col. 11)]. Total of Items 1 to 11 is to be reported under Col. 13.

3.11.12.4 Following two specific cases may be considered for reporting ex-factory value.

- a) For an item, output value of the entire amount of finished product or by-product may be calculated at cost price of producing the item and reported in Block J as ex-factory- value in cases where **a factory does not sell any quantity of that finished product/by-product relating to the specific item, although the item is produced during the current reference period.**
- b) Sale value may not be counted and reported for finished product/by-product relating to a specific item in the current reference period in cases where a factory **does not produce any quantity of that specific item during the current reference period but sells the same from last year stock only.**

3.11.13 **Block J: item13: Share(%) of products/by-products directly exported:** Share (%) of Gross Sale Value of the products/by-products directly exported is to be reported here.

3.12 Block K: ICT Indicators

3.12.0 Comparable statistics on access to, and use of, information and communication technologies (ICTs), are critical to formulating policies and strategies concerning ICT-enabled growth, for social inclusion and cohesion, and for monitoring and evaluating the impact of ICTs on economic and social developments. These questions have been formulated which are to be answered in affirmative (yes) or negative (no). The question will be answered “yes” if the factory use that facility for any purpose related to factory irrespective of the fact whether it relates to manufacturing activity or not. The explanatory notes along with the item descriptions are given below:

Block K: Information and Communication technology (ICT) usage		
Sl. No.	ICT indicator	yes-1, no-2
1.	Did the factory use computer/s during FY 2020-21?	
2.	Did the factory use the Internet during FY 2020-21?	
3.	Does the factory have a web site as on the date of survey?	
4.	Did the factory receive orders via the Internet during FY 2020-21?	
5.	Did the factory place orders for business purpose via the Internet during	
6.	Did the factory connect to the Internet either by a. Narrowband or b. Fixed broadband or by c. Mobile broadband during FY 2020-21?	
7.	Does the factory have a local area network (LAN) as on the date of survey?	

Explanatory Notes
A computer refers to a desktop or a laptop computer. It does not include equipment with some embedded computing abilities such as mobile cellular phones, personal digital assistants (PDA) or TV sets.
The Internet is a worldwide public computer network. It provides access to a number of communication services including the World Wide Web and carries email, news, entertainment and data files, irrespective of the device used (not assumed to be only via a computer - it may also be by mobile phone, games machine, digital TV, etc.). Access can be via a fixed or mobile network.
A web presence includes a website, home page or presence on another entity's website (including a related business). It excludes inclusion in an on-line directory of any other webpages where the business does not have control over the content of the page.
Orders received include orders received via the Internet whether or not payment was made online. They include orders received via websites, specialized Internet marketplaces, extranets, EDI over the Internet, Internet-enabled mobile phones and email. They also include orders received on behalf of other organizations – and orders received by other organizations on behalf of the business. They exclude orders that were cancelled or not completed.
Orders placed include orders placed via the Internet whether or not payment was made online. They include orders placed via websites, specialized Internet marketplaces, extranets, EDI over the Internet, Internet-enabled mobile phones and email. They exclude orders that were cancelled or not completed.
Narrowband includes analogue modem (dial-up via standard phone line), Integrated Services Digital Network (ISDN), Digital Subscriber Line (DSL) at speeds below 256 kbit/s, and mobile phone and other forms of access with an advertised download speed of less than 256 kbit/s. Narrowband mobile phone access services include CDMA 1x (Release 0), GPRS, WAP and imode
Fixed broadband refers to technologies such as DSL, at speeds of at least 256 kbit/s, cable modem, high speed leased lines, fibre-to-the-home, powerline, satellite, fixed wireless, Wireless Local Area Network (WLAN) and WiMAX.
Mobile broadband access services include Wideband CDMA (W-CDMA), known as Universal Mobile Telecommunications System (UMTS) in Europe; High-speed Downlink Packet Access (HSDPA), complemented by High-Speed Uplink Packet Access (HSUPA); CDMA2000 1xEV-DO and DCMA 2000 1xEV-DV. Access can be via any device (mobile, cellular phone, laptop, PDA, etc.)
A LAN refers to a network connecting computers within a localized area such as a single building, department or site; it may be wireless.

3.13 Block L: Energy Conservation

3.13.0 Energy conservation is the practice of decreasing the quantity of energy used. It may be achieved through efficient energy use, in which case energy use is decreased while achieving a similar outcome, or by reduced consumption of energy services. The energy saved by the factory in four fields mentioned here should be answered in 'yes'

or 'no' mode. As this cannot be quantifiable, so any initiative made by the factory owner to save the energy will qualify for 'yes' whether it is directly used for manufacturing activity or not.

3.14 Block N: Comments of Superintending officer/Scrutinizing officer are to be recorded here. Reasons for negative working capital and for any abnormal entries in the schedule should be given invariably.

3.15 Report of Scrutiny of Part-I of the Return

3.15.0 The Scrutiny sheet is to be filled in by the scrutinising officer for some consistency checks pertaining to the return. This has two parts, viz., Part-A and Part-B.

3.15.1 Part A

3.15.1.1 Serial no 1: The average rate per unit and unit of reporting should be recorded for each item of indigenous input. This needs to be copied from Block H. The high rate or low rate should be supported by appropriate comments from the official preparing the scrutiny sheet. The rate per unit is also to be recorded for coal and electricity.

3.15.1.2 Serial no. 2: The average rate per unit and unit of reporting should be reported for each item of directly imported item of input. This needs to be copied from Block I. The high rate or low rate should be supported by appropriate comments from the official preparing the scrutiny sheet.

3.15.1.3 Serial no. 3: Percentage yield of product from the basic materials consumed (in case the quantities are common or directly convertible in whole number) is to be recorded here.

3.15.1.4 Serial no. 4: All the 14 items mentioned here need to be calculated *independently by Scrutinizing Officer* as per formula mentioned against each item. *Care should be taken to ensure that Gross Value Added as calculated by Gross Sale Value Approach (Srl. No. 9) and by Ex-factory value approach, should tally (Srl. No. 14).*

3.15.1.5 Serial No 5: All the 13 items mentioned here need to *verified by Scrutinizing Officer* and code 1 for 'yes' and 2 for 'no' is to be recorded against each item.

3.15.2 Part B: All the 11 items mentioned here need to *verified by Scrutinizing Officer* and code 1 for 'yes' and 2 for 'no' is to be recorded against each item.

3.16 Records to be consulted for compilation of ASI Part I Schedule

3.16.0 A list of records to be consulted for compilation of Part-I of ASI return is given below for ready reference:

Srl. No.	Records to be consulted	Reference Blocks
1.	Balance sheet with schedules and annexure, ledger	Blocks-C & D
2.	Profit and loss account, ledger, sales tax register	Blocks-E to J
3.	Muster roll, attendance register, wage register, leave register, salary register, PF register, gratuity register etc.	Block-E

3.17 Part-II of ASI Schedule

3.17.0 Part-II of the ASI schedule is processed by Labour Bureau based on the data collected by NSO, FOD. Labour Bureau also brings out Reports (in 2 volumes) on absenteeism, labour turnover, employment and labour cost based on the processed data of Block E of Part-I (employment and labour cost) and Part-II of the ASI schedule. This report meets the statutory obligation pertaining to Article 11 of Part-II of the ILO Convention No. 160 on Labour Statistics, which was ratified by India on 01.04.1992.

3.17.1 The scope of labour statistics extends to all labour borne on the rolls and engaged in work connected directly or indirectly with the manufacturing process. This includes labour engaged in repair and maintenance or production of fixed assets for the factory's own use, for generating electricity, producing coal gas and steam and all staff engaged in administration and clerical work. Part-II of ASI schedule consists of 2 blocks, namely, Block 1 giving the identification and other particulars of the selected unit and Block 2 containing items of information on mandays worked, absenteeism and labour turn over for regular workers directly employed for each month of the year.

3.17.2 Block 1: Identification and other particulars: Items 1 to 12 (excluding 11) are to be copied by the factory owner from respective items in Blocks A and B of Part-I. The rest of the items are not to be filled in by the factory owner.

3.17.3 Block 2: Mandays worked, absenteeism and labour turn over for regular workers directly employed for each month of the year: In this block, the information should relate to the mandays worked, absenteeism and labour turnover for *regular workers, directly employed*, for each calendar month of the Financial Year. In case of seasonal industries, the information should relate to only those months during which production of main item was carried on.

3.17.3.1 The term 'worker' used in this block has the same meaning as defined for Block E of Part-I of the schedule, except that **its scope is limited only to regular workers employed directly**. A regular worker is one whose nature of employment is regular and *includes permanent, probationers and temporary workers*.

3.17.3.2 It excludes casual, *badli* or substitute workers and workers employed through contractors and information pertaining to these categories of workers will not be included in this block. A casual worker is one whose employment is of a casual nature or in other words a casual worker is a person who is employed on day to day basis when need arises but without assurance of continuous employment. Normally, such workers are at work in factories. All *badli* or substitute workers should be treated as casual workers.
