

(i) a person may be engaged for a relatively long period during the 365 days in an economic (a non-economic activity) and for a relatively small period, which is not less than 30 days, in another economic activity (any economic activity).

(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for relatively small period in a subsidiary capacity. In such cases, since both the activities were being pursued throughout the year and the duration of both the activities is more than 30 days, the activity which was being pursued for a relatively small period was considered as his/ her subsidiary activity.

2.20.4 Current weekly activity status (CWS): The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided **on the basis of a certain priority cum major time criterion**. According to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work', which in turn gets priority over the status of 'neither working nor available for work'. *A person is considered working (or employed) if he/ she worked for at least one hour on at least one day during the 7 days preceding the date of survey or if he/she had work for at least 1 hour on at least one day during the 7 days preceding the date of the survey but did not do the work.* A person is considered 'seeking or available for work (or unemployed)' if during the reference week no economic activity was pursued by the person but he/ she made efforts to get work or had been available for work for at least one hour on any day during the reference week. A person who had neither worked nor was available for work any time during the reference week, is considered to be engaged in non-economic activities (or not in labour force). Having decided the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current weekly activity status is again decided on the basis of 'major time' criterion if a person was pursuing multiple economic activities.

2.20.5 Current daily activity status (CDS): The current daily activity status for a person is determined on the basis of his/ her activity status on each day of the reference week using a priority-cum-major time criterion. As mentioned earlier, according to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work', which in turn gets priority over the status of 'neither working nor available for work'. The following points were used for determining the current daily status of a person:

- i) If on a day, a person 'had actually worked for 1 hour or more' or 'had work for 1 hour or more but did not do the work', he was given work status code.
- ii) For each day at most two economic activities (work activities) were recorded.
- iii) Economic activities were differentiated at *status x 2-digit of NIC-2008*.
- iv) If a person was not engaged in 'work' even for 1 hour on a day, only one status code relevant for unemployment status or out of labour force status, as the case may be was recorded using a priority-cum-major time criteria.

2.21 In the of PLFS, the current weekly activity status of a person is derived from the information on hours worked in the different activities of a person during 7 days of the reference week.

2.22 Industry and occupation of the work activity: For the workers (employed persons), to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 97 (Activities of households as employers of domestic personnel) of NIC-2008, eight additional codes were used in the survey viz., housemaid /servant (97001), cook (97002), gardener (97003), gatekeeper/chowkidar/watchman (97004), governess/baby-sitter (97005), tutor (97006), driver (97007) and 'others' (97009). Broad structure of NIC-2008 (Sections and Divisions) and description of occupation divisions/sub-divisions of NCO-2004 have been presented at the end of this Chapter in **Annexure I** and **Annexure II**, respectively.

2.23 Hours actually worked: 'Hours actually worked' for a person was obtained in the line of the concept of '*hours actually worked*' as defined by ILO in its 18th ICLS (International Conference of Labour Statisticians) and in consideration of the production boundary followed by NSSO to define the economic activities.

2.23.1 'Hours actually worked' by a person on a day is the total time spent by the person on that day towards production of all goods and services that are considered as economic activities. It included (i) the hours spent directly on production activity, (ii) hours related to the production activity i.e., hours required to maintain, facilitate or enhance productive activities, (iii) hours accounted for unavoidable 'in-between time' in the course of production process when the person continues to be available for work such as work or machinery breakdown or accident or lack of supplies etc., (iv) hours allowed for short rest or refreshment. All other time that had not been involved for work, even if paid for, was excluded. The production activity performed in any location (in the economic territory/ establishment, on the street, at home, elsewhere away from usual work location) was considered for getting hours actually worked.

2.23.2 Therefore, hours actually worked included

- (i) hours spent directly on production:
 - (a) hours worked during normal periods of work;
 - (b) hours worked in addition to normal periods of work (such as overtime);
- (ii) hours related to the production activity:
 - (a) time spent at the place of work for preparation of the workplace, repairs and maintenance, preparation and cleaning of tools, and the preparation of receipts, time sheets and reports etc.,
 - (b) time spent for purchasing raw or basic materials or resale goods, transporting products to/from the market, source or home,
 - (c) time spent for waiting for business, customers, patients, on-call duty,
 - (d) time spent for travelling between work locations, to reach field projects, fishing areas, assignments, conferences or to meet clients (such as door-to-door vending), patients,

- (e) time spent for receiving training to acquire new skills or techniques and for upgrading or enhancement of skills for jobs in the economic unit, at or away from the work location,
- (iii) Time spent at the place of work when persons could not work for reasons such as lack of supply of work, breakdown of machinery or accidents, but continued to be available for work. This 'in-between time' is unavoidable or inherent to the job and involves temporary interruptions of a technical, material or economic nature.
- (iv) Time spent for short periods of rest, relief or refreshment at the work place including tea, coffee etc.,

and hours actually worked excluded

- (i) hours not worked, irrespective of payment, such as weekly holidays, annual leave, public holidays, sick leave, parental (maternity/paternity) leave, other leave for personal or family reasons, etc.,
- (ii) time spent on travel from home to work and vice versa,
- (iii) time spent for longer breaks such as meal breaks when no productive activity is performed, even when paid by the employer,
- (iv) time spent in educational activity not intended for the economic unit even when authorized, paid or provided by the employer.

2.23.3 Determination of hours actually worked for self-employed persons in some specific cases: Many of the self-employed persons have atypical ways of working, for example those engaged in agricultural activities, fisheries or a shop owner. For collecting information on hours actually worked by the self-employed persons, following points were considered:

- (a) For determination of the actual hours of work for these categories of workers, the basic criterion followed was whether they were available for the work to be performed. The availability criterion was judged by considering whether they were ready to receive order or attend to clients or to perform the economic activities.
- (b) However, period of absence from work was excluded. Absence from work might be due to illness, occupational injury, leave or care for dependants (including the elderly) and other types of absence due to personal reasons. Besides, periods of absence affecting or stemming from the economic unit, workplace or establishment for technical or economic reasons, strike activity, by bad weather, were also excluded. The absence from work might be due to economic reasons such as reduction in activity.
- (c) When the economic activity in which the person was engaged did not require actual working for production purpose, such periods were excluded from the count of hours actually worked.
- (d) Thus, the period during which the self-employed persons were actually absent from work was excluded from the calculation of hours actually worked.

2.24 Hours would have worked: The 'hours would have worked' related to the hours the person would have worked had he worked in the economic activity from which the person was temporarily off.

2.25 Earnings of the regular salaried/wage employees and casual labours: For collecting information on earning of 'regular salaried/wage employees' and 'casual labours', following points were taken into consideration:

- (a) Earnings of the regular salaried/wage employees and casual labours relates to remuneration in cash and in kind which were paid, as a rule at regular intervals, for time worked (including overtime payments) or work done together with remuneration for time not worked, such as for annual vacation, other paid leave or holidays.
- (b) It relates to employees' gross remuneration, i.e. the total before any deductions were made by the employer in respect of taxes, contributions of employees to social security and pension schemes, life insurance premiums and other obligations of employees.
- (c) Earnings exclude employers' contributions paid to social security and pension schemes in respect of their employees and also the benefits received by employees under these schemes.
- (d) Earnings also exclude severance and termination pay.
- (e) The wages in kind were evaluated at the respective current retail price.
- (f) Bonus (expected or paid) was duly apportioned for the reference period for inclusion in earnings.

2.26 Gross earnings of self-employed persons: The gross earnings of the self-employed persons during a reference period was derived by the procedure stated below:

- (a) Gross earnings of the self-employed persons during a reference period was obtained by deducting total expenses from the gross output of that period.
- (b) The gross output corresponds to the sum of the values of all goods and services produced during the reference period, including any part which has been retained for own consumption or given free of charge or at reduced prices to hired labour.
- (c) The valuation of output was made at basic price. The basic price is defined as the amount receivable by the producer from the purchaser for a unit of good or service produced as output minus any tax payable on product (like, excise duties, sales tax, non-deductable vat etc.) plus any subsidy receivable on the product for selling those to the ultimate consumer at lesser price.
- (d) Total expenses include (i) current expenses of the enterprise, such as purchase of raw materials, tools and equipment, fuel, electricity, etc., (ii) payments to hired labour, (iii) rent paid for fixed capital items and interest payments on financial assets, (iv) taxes on production (like, recurrent taxes on land & buildings, business or professional licence fees, road tax, registration fee of vehicles etc.) paid by the enterprise, reduced by subsidies received on production (like, employing physically challenged persons, installing pollution control equipment etc.).

- (e) Thus, gross earning = gross output – total expenses
- (f) If the owners of the enterprise are from the same household, earning was judged by considering equal distribution of income among all the owners. If the owners of the enterprise were from the different households, earning from the partnership business was be distributed, according to the agreement (verbal or written), among the partner households.
- (g) For helpers in household enterprises, gross earnings was considered as zero (0).

2.27 Enterprise: An enterprise is an undertaking which is engaged in the production and/ or distribution of some goods and/ or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household, or by several households jointly, or by an institutional body.

2.28 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.29 Definitions of various types of enterprises:

(i) **Proprietary:** When an individual is the sole owner of an enterprise it is a proprietary enterprise. Own account production of fixed assets for own use, when produced by a single member, will be classified as proprietary enterprise.

(ii) **Partnership:** Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. There may be two or more owners, belonging to the same or different households, on a partnership basis, with or without formal registration (where there is a tacit understanding about the distribution of profit among the so-called partners). Own account production of fixed assets, when produced by two or more members belonging to the same or different households was classified as partnership enterprises. Thus, own account production of fixed assets by a group of households for community use was classified as partnership enterprise.

(iii) **Government/Local Body:** Government/local body included Government administrative departments of both the Central and State Governments, local bodies of rural and urban areas and Departmental Enterprises like Indian Railways, Department of Post, etc.

(iv) **Public Sector Enterprises:** Public Sector Enterprises included government companies and subsidiaries of government companies and statutory corporations set up under special enactments of Parliament or State Legislatures. Some of these are Damodar Valley Corporation, Food Corporation of India, Airports Authority of India, Road Transport Corporations, Warehousing Corporations, Electricity Boards, etc. Some of the financial enterprises included the nationalised banks, Central and State financial corporations, LIC, GIC, Employees State Insurance

Corporation (ESIC), etc. The non-financial public sector enterprises consisted of all the undertakings/ enterprises of central, state, union territory governments and local authorities under the industry groups agriculture, forestry and logging, fishing, mining, manufacturing, electricity and gas, road, air and water transport including port trusts, storage and warehousing, trade, hotels & restaurants and other services.

(v) **Autonomous Bodies:** Autonomous Bodies are mostly set up by an Act of Parliament/Assembly or registered under Societies Registration Act. However, they are separate from Government Administrative Departments as they enjoy certain degree of autonomy in their day to day functioning. They receive grants from Government in addition to their own resources. Further, these are engaged in non-market production. Some of the autonomous bodies are: All India Institute of Medical Sciences, Indian Institute of Technology, Indian Statistical Institute, Housing Boards, Development Boards, Pollution Control Boards etc.

(vi) **Public Limited Company:** A public limited company is defined as a company that is not a private company. As such public companies can have an unlimited number of members and can invite the public to subscribe to its shares and debentures. The minimum number of members required to form a public limited company is seven.

(vii) **Private Limited Company:** Private limited company means a company which by its articles:

- (a) restricts the right to transfer its shares, if any,
- (b) limits the number of its members to two hundred not including-
 - (i) persons who are in the employment of the company, and
 - (ii) persons who, having been formerly in the employment of the company, were members of the company while in that employment and have continued to be members after the employment ceased; and
- (c) prohibits any invitation to the public to subscribe for any share in, or debentures of, the company.

[Where two or more persons hold jointly one or more shares in a company, they shall, for the purpose of this definition, be treated as a single member.]

(viii) **Co-operative Societies:** Co-operative society is one that is formed through the co-operation of a number of persons, recognised as members of the society, to benefit themselves. In the process, the funds are raised by members' contributions/investments and the profits generated out of the society's activities are shared by the members. The government itself in a government agency can also be a member or shareholder of a registered co-operative society but this fact cannot render the society into a public sector enterprise for the purpose of this survey.

(ix) **Trust:** An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of

securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees.

(x) **Non-Profit Institutions (NPI):** NPIs are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but any surpluses they happen to make cannot be appropriated by other institutional units. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share in any profits or other income which they receive.

2.30 Number of workers in the enterprise: Information on number of workers in the enterprise, where the persons worked, was collected in terms of 5 codes. The number of workers employed in the enterprise on an average in a day of operation, irrespective of whether they are hired worker or household members working in the enterprise, was considered as the number of workers in the enterprise. The number of workers also included working owner(s).

2.31 Type of job contract: For each employee in the usual status, it was ascertained whether there was any *written contract or agreement* with his/her employer in respect of duration of employment for the job he/she was engaged. For those who reported to have written job contract with their employer, further probing was done in respect of the length of duration contracted, viz., *for 1 year or less, for more than 1 year to 3 years and more than 3 years*. If the contract of employment specified a particular date of termination which was more than 3 years or if the type of job contracted was such that no time was fixed but the contract could only be terminated for certain administrative reasons such as incompetence, misconduct or for economic reasons then the contract was considered to have a duration of 3 years or more. However, if no written contract existed, then irrespective of the duration of employment, it was considered as no written job contract.

2.32 Eligibility of paid leave: For the employees in the usual status, it was ascertained whether they were eligible to get paid leave. Paid leave included leave during sickness, maternity, or such leave, as an employee was eligible to take without loss of pay, as per the conditions of employment. The situation was assessed excluding the paid off-days/holidays, which an enterprise normally allows to its employees. Employees were classified as those with eligibility for paid leave and those without eligibility for paid leave.

2.33 Availability of social security benefits: For the employees in the usual status, it was ascertained whether they were covered under any of the specified social security benefits or a combination of them which are arranged by the employer or for which contribution is made by the employer. For the purpose of the survey the following schemes were considered as social security benefits:

only PF/ pension (i.e., GPF, CPF, PPF, pension, etc.).
only gratuity
only health care & maternity benefits
only PF/ pension and gratuity
only PF/ pension and health care & maternity benefits.
only gratuity and health care & maternity benefits
PF/ pension, gratuity and health care & maternity benefits

Those who were not covered under any of the above social security schemes were considered as not eligible for any social security benefits.

2.33.1 The term Provident Fund (PF) included General Provident Fund, Contributory Provident Fund, Public Provident Fund, Employees Provident Fund, etc. It may be mentioned that coverage under any of these social security schemes meant that the employer contributed/ arranged/ paid in implementing the social security benefits for the worker. If an employee operated, in his/ her individual capacity, a PPF account and the employer is not contributing in that account then it was not considered as a social security benefit. On the contrary, a scheme, in which both the employee and the employer contributed, was considered a social security benefit. When benefits were given by the employer for treatment of illness/ injury or an employee was eligible for paid leave for a specified period of pre-natal/ childbirth/ post-natal stages or the expenditure for maternity care or childbirth was borne by the employer as per the conditions of employment, then such benefits were considered as health care & maternity benefits. There were cases where the employer was not directly contributing in a social security scheme for the employees, but being the member of the welfare association or organization or scheme in relation to the specific activity carried out by the employer, the employees got the benefit from that welfare association/ organization/ scheme. Such cases were also considered as social security benefits availed through the employer.

2.34 Guidelines of International Conference of Labour Statisticians (ICLS) on informal sector and informal employment: Broad guideline regarding the concept of informal sector and informal employment as enunciated in the 15th International Conference of Labour Statisticians (ICLS) and 17th ICLS, are given below. Extracts of the resolutions and guidelines concerning informal sector and informal employment are given in **Annexure III** and **Annexure IV** respectively, at the end of Chapter Two.

2.34.1 As per 15th ICLS, the *informal sector* is broadly characterized as consisting of:

- (a) units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

- (b) production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Thus, for statistical purposes, the *informal sector*, as per guidelines of 15th ICLS is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts, forms part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households.

2.34.2 According to the 17th ICLS framework, *informal employment* is identified by jobs classified by status of employment of the workers and the types of production units in which they were employed. The different types of production units are: (a) *formal sector enterprises*, (b) *informal sector enterprises*, and (c) *households which produce goods for their own final use and/or those employing domestic workers*. The status of employment of the workers performing the jobs may be (a) *own account workers*, (b) *employers*, (c) *contributing family workers*, (d) *employees*, or (e) *member of informal producers' co-operatives*. The employment may be considered as formal or informal depending upon the type of enterprises in which the workers are engaged or the nature of work they perform.

The *informal employment* comprises jobs held by:

- own-account workers and employers who have their own informal sector enterprises;
- contributing family workers, irrespective of whether they work in formal or informal sector enterprises;
- employees who have informal jobs (for definition, see item (5) in paragraph 3 in Annexure IV) whether employed by formal sector enterprises, informal sector enterprises, or as paid domestic workers by households;
- members of informal producers' cooperatives; and
- persons engaged in the own-account production of goods exclusively for own final use by their household, such as subsistence farming or do-it-yourself construction of own dwellings.

2.35 Informal sector and conditions of employment in PLFS: In the PLFS for usual status workers in industry groups/divisions 014, 016, 017, 02-99 of NIC-2008, information on enterprise type was collected and the enterprise types *proprietary and partnership* are classified as informal sector enterprises. Besides, information on conditions of employment of the employees in the usual status engaged in industry groups/divisions 014, 016, 017, 02-99 of NIC-2008 was collected.

2.36 Coverage of Industry for collection of data on informal sector and conditions of employment: Information on characteristics of enterprises and conditions of employment was collected for both usual principal status workers and usual subsidiary status workers engaged in non-agricultural sector (industry divisions 05-99 of NIC-2008) and a part of the agricultural sector (industry groups 014, 016, 017 and divisions 02, 03 of NIC-2008). In the agricultural sector, industry groups 011 (growing of non-perennial crops), 012 (growing of perennial crops), 013 (plant propagation) and 015 (mixed farming) of NIC – 2008 were excluded for collection of information on characteristics of enterprises and conditions of employment. The industry groups/divisions 014, 016, 017, 02 and 03 are in the [AG]ricultural sector [E]xcluding [G]rowing of [C]rops, plant propagation, combined production of crops and animals without a specialized production of crops or animals (referred to as AGE GC activities). Information on the existence of union/association was collected for the usual status workers engaged in any industry of NIC - 2008. The description of the Industry Groups 014, 016 and 017 are as follows:

- Group 014: Animal production
- Group 016: Support activities to agriculture and post-harvest crop activities
- Group 017: Hunting, trapping and related service activities

2.37 Social group: For each household surveyed, the social group to which the head of the household belonged to was recorded. The social group of the head of the household was considered as the social group of all the members of the household irrespective of the actual social group to which the individual members belonged. In the survey, information was collected in respect of four social groups viz. *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and the rest referred to as *others*. The information recorded in this regard was based entirely on the response of the informant and not based on any state or central level list of the social group.

2.38 Religious group: For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. The information recorded in this regard was based entirely on the response of the informant.

2.39 Conceptual Framework of Key Employment and Unemployment Indicators: From the Periodic Labour Force Survey (PLFS), the Key employment and unemployment Indicators viz. LFPR, WPR, PU and UR are derived. The definitions of these indicators are as follows:

1. **Labour force participation rate (LFPR):** LFPR is defined as the percentage of persons in the labour force in the population.
2. **Worker Population Ratio (WPR):** WPR defined as the percentage of employed persons in the population.
3. **Proportion Unemployed (PU):** It is defined as the percentage of persons unemployed in the population.
4. **Unemployment Rate (UR):** UR is defined as the percentage of persons unemployed among the persons in the labour force.

2.39.1 The architecture of key labour force indicators are given below in tabular form:

activity profile		key indicators			
activity status(code)	category of persons				
11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72	workers	1. Labour Force Participation Rate (LFPR):	$\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 100$		
		2. Worker Population Ratio (WPR):	$\frac{\text{no. of employed persons}}{\text{total population}} * 100$		
81, 82	unemployed	3. Proportion Unemployed (PU):	$\frac{\text{no. of unemployed persons}}{\text{total population}} * 100$		
91, 92 93, 94, 95, 97, 98, 99	not in labour force	4. Unemployment Rate (UR):	$\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 100$		

Note: Activity status codes, 42, 61, 62, 71, 72, 82, and 98 are used only in the *current status* and the remaining activity status codes are used in both *usual status* and in *current status*

2.40 Decile Class of Usual Monthly Per Capita Consumer Expenditure (UMPCE): Information on Household Usual Monthly Consumer Expenditure was collected in PLFS *only* to classify the households in different UMPCE classes. Since this information was collected through a single-shot question, it cannot be used to estimate the household consumer expenditure which is generally estimated based on detailed household consumer expenditure survey of NSO (Schedule 1.0). Based on the information collected on Household Usual Monthly Consumer Expenditure, decile classes of Usual Monthly Per Capita Consumer Expenditure (UMPCE) were formed (with each decile class containing 10 per cent of the population) separately for each sector (rural/urban).

**BROAD STRUCTURE of NIC -2008
(SECTIONS AND DIVISIONS)**

Section A: Agriculture, forestry and fishing

Division 01: Crop and animal production, hunting and related service activities

Division 02: Forestry and logging

Division 03: Fishing and aquaculture

Section B: Mining and quarrying

Division 05: Mining of coal and lignite

Division 06: Extraction of crude petroleum and natural gas

Division 07: Mining of metal ores

Division 08: Other mining and quarrying

Division 09: Mining support service activities

Section C: Manufacturing

Division 10: Manufacture of food products

Division 11: Manufacture of beverages

Division 12: Manufacture of tobacco products

Division 13: Manufacture of textiles

Division 14: Manufacture of wearing apparel

Division 15: Manufacture of leather and related products

Division 16: Manufacture of wood and products of wood and cork, except furniture;
manufacture of articles of straw and plaiting materials

Division 17: Manufacture of paper and paper products

Division 18: Printing and reproduction of recorded media

Division 19: Manufacture of coke and refined petroleum products

Division 20: Manufacture of chemicals and chemical products

Division 21: Manufacture of pharmaceuticals, medicinal chemical and botanical products

Division 22: Manufacture of rubber and plastics products

Division 23: Manufacture of other non-metallic mineral products

Division 24: Manufacture of basic metals

Division 25: Manufacture of fabricated metal products, except machinery and equipment

Division 26: Manufacture of computer, electronic and optical products

Division 27: Manufacture of electrical equipment

Division 28: Manufacture of machinery and equipment n.e.c.

Division 29: Manufacture of motor vehicles, trailers and semi-trailers

Division 30: Manufacture of other transport equipment

Division 31: Manufacture of furniture

Division 32: Other manufacturing

Division 33: Repair and installation of machinery and equipment

Section D: Electricity, gas, steam and air conditioning supply

Division 35: Electricity, gas, steam and air conditioning supply

Section E: Water supply; sewerage, waste management and remediation activities

Division 36: Water collection, treatment and supply

Division 37: Sewerage

Division 38: Waste collection, treatment and disposal activities; materials recovery

Division 39: Remediation activities and other waste management services

Section F: Construction

Division 41: Construction of buildings

Division 42: Civil engineering

Division 43: Specialized construction activities

Section G: Wholesale and retail trade; repair of motor vehicles and motorcycles

Division 45: Wholesale and retail trade and repair of motor vehicles and motorcycles

Division 46: Wholesale trade, except of motor vehicles and motorcycles

Division 47: Retail trade, except of motor vehicles and motorcycles

Section H: Transportation and storage

Division 49: Land transport and transport via pipelines

Division 50: Water transport

Division 51: Air transport

Division 52: Warehousing and support activities for transportation

Division 53: Postal and courier activities

Section I: Accommodation and Food service activities

Division 55: Accommodation

Division 56 Food and beverage service activities

Section J: Information and communication

Division 58: Publishing activities

Division 59: Motion picture, video and television programme production, sound recording and music publishing activities

Division 60: Broadcasting and programming activities

Division 61: Telecommunications

Division 62: Computer programming, consultancy and related activities

Division 63: Information service activities

Section K: Financial and insurance activities

Division 64: Financial service activities, except insurance and pension funding
Division 65: Insurance, reinsurance and pension funding, except compulsory social security
Division 66: Other financial activities

Section L: Real estate activities

Division 68: Real estate activities

Section M: Professional, scientific and technical activities

Division 69: Legal and accounting activities
Division 70: Activities of head offices; management consultancy activities
Division 71: Architecture and engineering activities; technical testing and analysis
Division 72: Scientific research and development
Division 73: Advertising and market research

ANNEXURE – III

Resolution concerning statistics of employment in the informal sector, adopted by the Fifteenth International Conference of Labour Statisticians (January 1993)

[Extract]

Concept

5 (1) The informal sector may be broadly characterized as consisting of units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

(2) Production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Operational definitions

Informal sector

6 (1) For statistical purposes, the informal sector is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts (Rev. 4), form part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households as defined in paragraph 7.

(2) Within the household sector, the informal sector comprises (i) "informal own-account enterprises" as defined in paragraph 8; and (ii) the additional component consisting of "enterprises of informal employers" as defined in paragraph 9.

(3) The informal sector is defined irrespective of the kind of workplace where the productive activities are carried out, the extent of fixed capital assets used, the duration of the operation of the enterprise (perennial, seasonal or casual), and its operation as a main or secondary activity of the owner.

Household enterprises

7. According to the United Nations System of National Accounts (Rev. 4), household enterprises (or, equivalently, unincorporated enterprises owned by households) are distinguished from corporations and quasi-corporations on the basis of the legal organization of the units and the type of accounts kept for them. Household enterprises are units engaged in the production of goods or services which are not constituted as separate legal entities independently of the households or household members that own them, and for which no complete sets of accounts (including balance sheets of assets and liabilities) are available which would permit a clear distinction of the production activities of the enterprises from the other activities of their owners and the identification of any flows of income and capital between the enterprises and the owners. Household enterprises include unincorporated enterprises owned and operated by individual household members or by two or more members of the same household as well as unincorporated partnerships formed by members of different households.

Informal own-account enterprises

8 (1) Informal own-account enterprises are household enterprises (in the sense of paragraph 7) owned and operated by own-account workers, either alone or in partnership with members of the same or other households, which may employ contributing family workers and employees on an occasional basis, but do not employ employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, informal own-account enterprises may comprise, depending on national circumstances, either all own-account enterprises or only those which are not registered under specific forms of national legislation.

(3) Registration may refer to registration under factories or commercial acts, tax or social security laws, professional groups' regulatory acts, or similar acts, laws, or regulations established by national legislative bodies.

Enterprises of informal employers

9 (1) Enterprises of informal employers are household enterprises (in the sense of paragraph 7) owned and operated by employers, either alone or in partnership with members of the same or other households, which employ one or more employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, enterprises of informal employers may be defined, depending on national circumstances, in terms of one or more of the following criteria:

- (i) size of the unit below a specified level of employment;
- (ii) non-registration of the enterprise or its employees.

(3) While the size criterion should preferably refer to the number of employees employed on a continuous basis, in practice, it may also be specified in terms of the total number of employees or the number of persons engaged during the reference period.

(4) The upper size limit in the definition of enterprises of informal employers may vary between countries and branches of economic activity. It may be determined on the basis of minimum size requirements as embodied in relevant national legislations, where they exist, or in terms of empirically determined norms. The choice of the upper size limit should take account of the coverage of statistical inquiries of larger units in the corresponding branches of economic activity, where they exist, in order to avoid an overlap.

(5) In the case of enterprises, which carry out their activities in more than one establishment, the size criterion should, in principle, refer to each of the establishments separately rather than to the enterprise as a whole. Accordingly, an enterprise should be considered to satisfy the size criterion if none of its establishments exceeds the specified upper size limit.

(6) Registration of the enterprise may refer to registration under specific forms of national legislation as specified in subparagraph 8 (3). Employees may be considered registered if they are employed on the basis of an employment or apprenticeship contract which commits the employer to pay relevant taxes and social security contributions on behalf of the employee or which makes the employment relationship subject to standard labour legislation.

10. For particular analytical purposes, more specific definitions of the informal sector may be developed at the national level by introducing further criteria on the basis of the data collected. Such definitions may vary according to the needs of different users of the statistics.

Population employed in the informal sector

11 (1) The population employed in the informal sector comprises all persons who, during a given reference period, were employed (in the sense of paragraph 9 of resolution I adopted by the Thirteenth International Conference of Labour Statisticians) in at least one informal sector unit as defined in paragraphs 8 and 9, irrespective of their status in employment and whether it is their main or a secondary job.

Treatment of particular cases

14. Household enterprises, which are exclusively engaged in non-market production, i.e. the production of goods or services for own final consumption or own fixed capital formation as defined by the United Nations System of National Accounts (Rev. 4), should be excluded from the scope of the informal sector for the purpose of statistics of employment in the informal

sector. Depending on national circumstances, an exception may be made in respect of households employing domestic workers as referred to in paragraph 19.

16. For practical reasons, the scope of the informal sector may be limited to household enterprises engaged in non-agricultural activities. With account being taken of paragraph 14, all non-agricultural activities should be included in the scope of the informal sector, irrespective of whether the household enterprises carry them out as main or secondary activities. In particular, the informal sector should include secondary non-agricultural activities of household enterprises in the agricultural sector if they fulfil the requirements of paragraphs 8 or 9.

17. Units engaged in professional or technical activities carried out by self-employed persons, such as doctors, lawyers, accountants, architects or engineers, should be included in the informal sector if they fulfil the requirements of paragraphs 8 or 9.

18 (1) Outworkers are persons who agree to work for a particular enterprise, or to supply a certain quantity of goods or services to a particular enterprise, by prior arrangement or contract with that enterprise, but whose place of work is not within any of the establishments, which make up that enterprise.

(2) In order to facilitate data collection, all outworkers should be potentially included in the scope of informal sector surveys, irrespective of whether they constitute production units on their own (self-employed outworkers) or form part of the enterprise, which employs them (employee outworkers). On the basis of the information collected, self-employed and employee outworkers should be distinguished from each other by using the criteria recommended in the United Nations System of National Accounts (Rev. 4). Outworkers should be included in the informal sector, or in the population employed in the informal sector, if the production units, which they constitute as self-employed persons or for which they work as employees fulfil the requirements of paragraphs 8 or 9.

19. Domestic workers are persons exclusively engaged by households to render domestic services for payment in cash or in kind. Domestic workers should be included in or excluded from the informal sector depending upon national circumstances and the intended uses of the statistics. In either case, domestic workers should be identified as a separate sub-category in order to enhance international comparability of the statistics.
